PHASE I ENVIRONMENTAL SITE ASSESSMENT
75 DARLING AVENUE
SOUTH PORTLAND, MAINE

EXECUTIVE SUMMARY

Haley Ward, Inc. (Haley Ward) completed a Phase I Environmental Site Assessment (ESA) for the property located at 75 Darling Avenue (the Subject Property), to determine whether the Subject Property has Recognized Environmental Conditions (RECs), as defined by the ASTM International (ASTM) Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, and in compliance with the All Appropriate Inquiry (AAI) Rule. ASTM 1527-13 is the ASTM standard currently recognized by the U.S. Environmental Protection Agency (USEPA) as meeting the All-Appropriate Inquiry standard. This Phase I ESA also incorporates procedures set forth in ASTM 1527-21. This Phase I ESA was completed by Ms. Suzanne Yerina and Mr. Dennis Kingman, who are both considered Environmental Professionals as defined in §312.10 of 40 CFR 312. This ESA was performed between October 18, 2022 and November 5, 2022.

The Subject Property consists of an approximately 2.1-acre parcel identified as Lot 17 on the City of South Portland Property Tax Map 48. The Subject Property is currently developed with an approximately 30,000 square-foot one-story commercial structure on a concrete slab constructed in 1977 and is currently used as the Food Security Hub for Preble Street.

A legal description for the Subject Property is recorded in the Cumberland County Registry of Deeds on Page 73 of Book 39245 and is currently owned by 75 Darling Preble Street LLC.

Historical records reviewed during the completion of this Phase I ESA indicate that the Subject Property was initially developed in 1977 with the current Subject Property building. The property was undeveloped prior to 1977. From 1988 thru 1998, various commercial companies have occupied the building including a bearing distribution company, janitorial supply company, mobile sound systems company, medical supplier, a plastic supply company, garden and landscaping company, and appliance parts company as well as offices for The Maine Safety Council. The Subject Property appeared to be vacant from at least 2001 until at least 2018. After that time, the Subject Property was occupied by a financial services company and was used as office space.

Reconnaissance of the Subject Property was performed on October 21, 2022. Regulatory agency databases and records, historical aerial photographs, fire insurance maps, city directories, previous environmental assessment reports, as well as other sources were researched to help identify RECs, Controlled Recognized Environmental Conditions (CRECs), Historical Recognized Environmental Conditions (HRECs), and *de minimis* conditions associated with the Subject Property.

During the completion of this Phase I ESA, known or suspected Historical Recognized Environmental Conditions (HRECs), Controlled Recognized Environmental Conditions (CRECs), and/or *de minimis* conditions were not identified.

The following Recognized Environmental Condition (REC) was identified during completion of this Phase I ESA:

- Although a corresponding spill report was not identified by Haley Ward for the UST removals in 1990, the potential exists for petroleum contamination at the Subject Property.

The following other environmental concern was identified during completion of this Phase I ESA:

- ACM and/or LBP may be present in the Subject Property building due to the age of the structure.

Based on the Tier 1 Vapor Encroachment Screening of the Subject Property, a Vapor Encroachment Condition (VEC) cannot be ruled out as petroleum impacted soil associated with former USTs may remain on the Subject Property.

Limiting conditions were not encountered at the time of the Subject Property visit that would prevent the assessment of potential environmental impacts to the Subject Property.

Haley Ward has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E 1527-13 and the procedures prescribed in the ASTM Standard E 1527-21, on the Subject Property located at 75 Darling Avenue in South Portland, Maine. This Phase I ESA report and the associated conclusions are valid until April 16, 2023, which is 180 days from the first activity associated with this report, assuming the Subject Property conditions remain unchanged.

SECTION 1 | INTRODUCTION

This report describes the Phase I Environmental Site Assessment (ESA) completed by Haley Ward, Inc. (Haley Ward) for the property located at 75 Darling Avenue in South Portland, Maine and identified as Lot 17 on the City of South Portland Property Tax Map 48 (the Subject Property). This Phase I ESA was completed by Haley Ward for, and at the request of, Preble Street (the Client).

1.1 Purpose

The purpose of this Phase I ESA is to identify, to the extent feasible, evidence of existing or past release(s) or a material threat of a future release of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and/or controlled substances at, or in the immediate vicinity of the Subject Property (i.e., “Recognized Environmental Conditions” (RECs), as defined by the ASTM International (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-13). ASTM 1527-13 is the ASTM standard currently recognized by the U.S. Environmental Protection Agency (USEPA) as meeting the All-Appropriate Inquiry standard. This Phase I ESA also incorporates procedures set forth in ASTM 1527-21. This practice is intended to permit a User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (as amended, 42 USC §9601 et. seq.)) liability (hereinafter, the “landowner liability protections,” or “LLPs”); that is, the practice that constitutes all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice as defined in 42 U.S.C. §9601(35)(B).

Not all aspects of ASTM E 1527-13 may be applicable to the Subject Property being assessed.

The following definitions were used during the completion of this Phase I ESA in determining the presence of Environmental Conditions and/or *de minimis* conditions associated with the Subject Property:

A Recognized Environmental Condition (REC) is (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

A Controlled Recognized Environmental Condition (CREC) is a recognized environmental condition affecting the Subject Property that has been addressed

to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, Activity and Use Limitations (AULs) or other property use limitations).

A Historical Recognized Environmental Condition (HREC) is a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example, AULs or other property use limitations). HRECs are not considered to be RECs.

De minimis conditions are condition(s) related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. *De minimis* conditions are not considered to be RECs.

1.2 Detailed Scope of Services

The findings presented in this Phase I ESA report are based on the following activities completed by Haley Ward:

1. A site reconnaissance on October 21, 2022, to observe environmental conditions at the Subject Property and adjoining properties.
2. Review of database searches of government environmental records on October 18, 2022, to identify federal- or state-listed properties within the search radii specified in the ASTM E 1527-13 Standard.
3. Review of property transaction records in the form of deeds on the Cumberland County Registry of Deeds website on October 21, 2022.
4. Review of state records maintained by the Maine Department of Environmental Protection (MDEP) on October 18, 2022, to research sites identified by the database search and MDEP files.
5. Review of property records from the City of South Portland municipal offices for the Subject Property and adjoining properties on October 21, regarding property history.
6. Interview with Mr. Chris Saunders, Vice President of Operations with Preble Street, on October 21, 2022.
7. Review of All Appropriate Inquiry (AAI) "User" Questionnaire and Phase I ESA Questionnaire received from Mr. Christopher Saunders on behalf of Preble Street on November 9, 2022.

1.3 Significant Assumptions

Based on a review of the City of South Portland property tax records, this Phase I ESA report considers the Subject Property to be comprised of approximately 2.1

acres of land in South Portland, Maine. The Subject Property is identified as Lot 17 on the City of South Portland Property Tax Map 48. A copy of this property tax map is included in **Appendix G** of this report.

As part of the Phase I ESA process, and in accordance with ASTM E 1527-13 and ASTM E 1527-21, the Subject Property, including the periphery, was visually observed by Haley Ward personnel in order to obtain an understanding of issues which are impacting or may have impacted the Subject Property. Conditions which obstructed the investigator's ability to observe site conditions are considered "limiting conditions" and are noted in **Section 1.4** of this report. Haley Ward assumes that the assessment of accessible areas of the Subject Property provides an overview of the condition of the Subject Property and even though it may not identify all concerns, it represents the type and magnitude of impacts on the Subject Property as the result of past and present uses. **Existing** features (e.g., bodies of water, adjacent buildings, etc.) did not obstruct visual observation of the Subject Property.

Haley Ward did not make any other significant assumptions while conducting this Phase I ESA.

1.4 Limitations and Exceptions

Haley Ward prepared this report for the exclusive use of the Client and their assigns, and it should not be reproduced or disseminated without the written approval of Haley Ward or the Client. Haley Ward has retained a copy of this report. Additions and/or deletions are not authorized without the written consent of Haley Ward. Use of this report in whole or in part by any party other than the Client or his/her authorized agent is prohibited.

Limiting conditions were not encountered at the time of the Subject Property visit that would prevent the assessment of potential environmental impacts to the Subject Property.

Assessment of the Subject Property (including the collection of samples for laboratory analysis) for the following potential environmental concerns are beyond the scope of the Phase I ESA and are not necessarily included within the scope of this report:

- Lead-Based Paint
- Radon
- Asbestos-Containing Materials
- Wetlands
- Ecological, cultural, and historical resources
- Indoor Air Quality (IAQ) (including mold, fungi, or microbial growth)
- Regulatory compliance
- Industrial hygiene and health and safety
- Endangered species
- Biological agents
- Controlled substance

1.5 Special Terms and Conditions

Special terms or conditions associated with the Subject Property or Haley Ward's abilities to complete the Scope of Services were not established or imposed by the Client/Owner during the completion of this Phase I ESA.

1.6 User Reliance

User, as defined in ASTM Practice E 1527, is the party seeking to use the ASTM Practice E 1527 to complete an environmental site assessment of the Subject Property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

This report does not necessarily address requirements of any state or local laws or of any federal laws other than the All-Appropriate Inquiry (AAI) provisions of the LLPs. Users are cautioned that federal, state, and local laws may impose environmental assessment obligations that are beyond the scope of this report. Users should also be aware that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered on the property that are not addressed in this report and that may pose risks of civil and/or criminal sanctions for non-compliance.

This report does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the User of this report to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

Mr. Daniel McCarthy on behalf of Preble Street (the Client), requested this Phase I ESA be performed and therefore Preble Street qualifies as the User. The User and its assigns are hereby permitted to rely upon this report and the conclusion therein and limitations stated in the report.

The conclusions discussed herein are based solely and in reliance upon information collected as a result of the activities detailed in **Section 1.2** of this report. Testing and/or sampling of materials was not conducted as part of this Phase I ESA. Guarantee cannot be made on the property subsurface conditions present at the Subject Property.

Haley Ward neither attests nor renders an opinion as to the accuracy or comprehensiveness of the statements of the individuals interviewed, available governmental records, environmental reports conducted by other consultants, analytical results, or the database search results provided by the database contractor. This Phase I ESA report and the associated conclusions are valid until April 16, 2023, which is 180 days from the first activity associated with this report, assuming the Subject Property conditions remain unchanged.

SECTION 2 | SITE DESCRIPTION

2.1 Site Location and Legal Description

The Subject Property consists of an approximately 2.1-acre parcel identified as Lot 17 on the City of South Portland Property Tax Map 48. A legal description is recorded in the Cumberland County Registry of Deeds on Page 73 of Book 39245 and is currently owned by the 75 Darling Preble Street LLC. Refer to **Figure 1** for a Location Map.

2.2 Subject Property and Vicinity General Characteristics

The Subject Property, which is located in an area zoned by the City of South Portland as “General Commercial District,” consists of a single-story structure on a concrete slab currently used as a food security hub for Preble Street. Adjoining properties include mixed-use commercial. General topography at the Subject Property and surrounding properties is relatively flat. Photographs of the Subject Property and surrounding properties are included in **Appendix A**. Aerial photographs of the Subject Property and surrounding properties are included in **Appendix B**.

2.3 Property Use

2.3.1 Current Use of Property

The Subject Property is currently occupied by the Food Security Hub for Preble Street, which provides meals and groceries to clients in need.

2.3.2 Past Use of Property

Historical records and information provided by the Client indicate that the Subject Property was purchased by 75 Darling Preble Street LLC in March 2022 and has operated as a food security hub since then. The property was undeveloped prior to 1977. From 1988 thru 1998, various commercial companies have occupied the building including a bearing distribution company, janitorial supply company, mobile sound systems company, medical supplier, a plastic supply company, garden and landscaping company, and appliance parts company as well as offices for The Maine Safety Council. The Subject Property appears to have been vacant from at least 2001 until at least 2018. After that time, the Subject Property was occupied by a financial services company and was used as office space.

2.4 Description of Structures, Roads, and Other Improvements

2.4.1 Structures

The Subject Property is currently developed with an approximately 30,000 square-foot one-story structure on a concrete slab constructed in 1977 and is currently operated as a Food Security Hub for Preble Street. Refer to **Figure 2** for a Site Sketch and **Appendix A** for photographs of the Subject Property.

2.4.2 Parking Areas and Roads

The Subject Property is accessed from Darling Avenue located to the northeast via an asphalt paved driveway. Paved parking areas present along all four sides of the Subject Property structure.

2.4.3 Heating and Air Conditioning

The building is heated by a forced hot air heating system fueled by natural gas. The building is equipped with a central air conditioning system.

2.4.4 Utilities

Electrical service is currently provided to the Subject Property by Central Maine Power via overhead lines along Darling Avenue. Potable water is provided by the Portland Maine Water District. Sewer service is provided by the City of South Portland Sewer Division. Natural gas service is provided by Unitil.

2.5 Use of Adjoining Properties

2.5.1 Current Use of Adjoining Properties

The Subject Property is located in an area of commercial development. Details on the current ownership of the adjoining properties are included in **Section 4.5.5** of this report.

2.5.2 Past Use of Adjoining Properties

Historically, the properties adjoining the Subject Property have included residential and commercial development including various types of health care, a marketing company, a compounding laboratory, rental car facility, transportation company, environmental safety and health company, and a financial services company. Other historical uses of the adjoining properties and properties in the immediate vicinity of the Subject Property were not identified during the research completed as part of this Phase I ESA.

SECTION 3 | USER PROVIDED INFORMATION

In accordance with ASTM Practice E 1527-13 and ASTM E 1527-21, in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the User of this ASTM standard must provide the following information (if available) to the Environmental Professional. Failure to provide this information could result in a determination that "All Appropriate Inquiry" (AAI) is not complete. Information summarized in this section is based upon the AAI "User" Questionnaire completed by Mr. Christopher Saunders, Vice President of Operations, representing the User, dated November 9, 2022, and is included in **Appendix H**.

3.1 Property Transaction Records

The User did not provide a copy of the current recorded deed. Haley Ward's review of the deeds is included in **Section 4.4.1** of this report.

3.2 Information Reported by User Regarding Environmental Liens or Activity and Use Limitations

The User is not aware of liens against the property that are filed or recorded under federal, state, tribal, or local law relating to current or past violations of environmental laws with respect to the Subject Property.

The User is not aware of any AULs that are filed or recorded in a registry under federal, state, tribal, or local law in connection with the Subject Property.

3.3 Specialized Knowledge

The User is aware that the Subject Property has been used as an office building. The User does not have other specialized knowledge regarding current or past uses and practices at the Subject Property.

3.4 Commonly Known or Reasonably Ascertainable Information

The availability of commonly known or reasonably ascertainable information associated with the Subject Property was investigated through the completion of the AAI User Questionnaire. The User is aware that the Subject Property has been used as an office building. Other commonly known or reasonably ascertainable information about the Subject Property was not provided in the User Questionnaire completed.

3.5 Valuation Reduction for Environmental Issues

Known potential environmental concerns or issues that could potentially affect the value of the Subject Property were not identified by the User.

3.6 Owner, Property Manager, and Occupant Information

The User provided Subject Property ownership information and a point of contact for the Subject Property. The property is currently owned by 75 Darling Preble Street LLC. Preble Street currently manages the property. Mr. Christopher Saunders (Preble Street) provided access to the Subject Property.

3.7 Reason for Performing Phase I

This Phase I ESA was completed to identify RECs at or in the immediate vicinity of the Subject Property, and to qualify the User for one of the LLPs under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Haley Ward understands that the Phase I ESA is being completed at the request of Preble Street for a potential property renovation.

3.8 Other

3.8.1 Previous Environmental Assessments

Previously completed reports were not provided to Haley Ward by the Users of this report.

3.8.2 Environmental Permits and/or Violations

Environmental permits and/or violations associated with the Subject Property were not identified by the Users.

SECTION 4 | RECORDS REVIEW

4.1 Standard Environmental Record Sources

Haley Ward obtained and reviewed radius searches of the federal and state environmental regulatory databases in accordance with ASTM E 1527-13 and ASTM E 1527-21 standards. Pertinent information is presented in the following sections. The Database Search Report (including databases searched, radius search distances, and detailed information regarding listed properties) is presented as **Appendix C**. Files reviewed at MDEP are included as **Appendix D**.

4.1.1 Federal Sources

4.1.1.1 National Priority List Sites

The database review did not identify National Priority List (NPL) (i.e., Superfund) properties within a 1.0-mile radius of the Subject Property or any de-listed NPL properties within a 0.5-mile radius of the Subject Property.

4.1.1.2 CERCLIS Listings

The database review did not identify the Subject Property or other properties within a 0.5-mile radius of the Subject Property as a Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) listing.

The database search did not identify the Subject Property or properties within a 0.5-mile radius of the Subject Property as CERCLIS NFRAP (no further remedial action is planned) facilities.

4.1.1.3 RCRA Facilities (RCRA TSDF)

The Subject Property was not identified as a Resource Conservation and Recovery Act (RCRA) hazardous waste generator facility. Nine RCRA hazardous waste generator facilities were identified within a 0.25-mile radius the Subject Property. These facilities do not adjoin the Subject Property and are therefore outside of the ASTM-specified search radius.

The database review did not identify the Subject Property as a RCRA Corrective Action (CORRACTS) facility; however, one RCRA CORRACTS facility was identified within a 1.0-mile radius of the Subject Property. This facility; Texas Instruments, is located 0.4 miles east of the Subject Property. According to the database report, human exposures and releases to groundwater are controlled and the site remedy has been constructed. This facility is not expected to have a negative environmental impact at the Subject Property due to its distance from the Subject Property and current regulatory status.

The database search did not identify the Subject Property or properties within a 0.5-mile radius of the Subject Property as RCRA non-CORRACTS treatment, storage, and disposal (TSD) facilities.

4.1.1.4 ERNS Sites

The database review did not identify the Subject Property as an Emergency Response Notification System (ERNS) site.

4.1.1.5 Federal Institutional Control/Engineering Control Registries

Federal Institutional Controls and Engineering Controls for the Subject Property were not identified by the database search or in property deeds reviewed on-line from the Cumberland County Registry of Deeds in Portland, Maine on October 21, 2022.

4.1.2 State and Tribal Sources

4.1.2.1 State and Tribal Listed Sites

The database review identified five properties within a 1.0-mile radius of the Subject Property as state and tribal hazardous waste properties. According to the database report, one of these facilities has been deleted from the hazardous waste site list. The remaining four facilities are located at least 0.178 miles side or downgradient relative to the Subject Property. These facilities are not expected to have a negative environmental impact at the Subject Property due to either their current regulatory status or their distance from the Subject Property.

Refer to **Appendix C** for a listing of state and tribal hazardous waste facilities within 1.0 miles of the Subject Property.

4.1.2.2 State and Tribal Landfill/Solid Waste Disposal Sites

The database review did not identify the Subject Property as a landfill or solid waste disposal property. Properties within a 0.5-mile radius of the Subject Property were not identified as state landfill facilities.

4.1.2.3 State and Tribal Leaking Storage Tanks

The database review did not identify spills from leaking storage tanks associated with the Subject Property. Thirteen properties within a 0.5-mile radius of the Subject Property were identified as Leaking Underground Storage Tank (LUST) facilities. The MDEP does not currently maintain a LUST database; however, these releases are included in the MDEP hazardous materials and oil spill files. Refer to **Section 4.1.2.7** for information associated with these LUST facilities.

4.1.2.4 State and Tribal Registered Storage Tanks

The database search identified the Subject Property as a state and tribal registered storage tank facility. An additional 18 properties were identified within a 0.25-mile radius of the Subject Property with Underground Storage Tanks (USTs).

Fifteen of the 18 locations are downgradient or greater than 0.16 miles from the Subject Property, therefore, these locations are not expected to have a negative environmental impact on the Subject Property. Details regarding USTs at and in the vicinity of the Subject Property include:

UST #8277, 75 Darling Ave Irrevocable Trust, 75 Darling Avenue (the Subject Property): This facility is registered with eight No. 2 fuel oil USTs ranging in size from 1,000 gallons to 3,000 gallons. The eight tanks were removed by Consolidated Environmental Services in January 1990. A UST closure assessment was not required as the USTs were used for on-site heating fuel. In addition, a corresponding spill report was not identified by Haley Ward. The file did not provide locations for the former USTs.

UST #8279, Briovarx Pharmacy, 53 Darling Avenue (adjoining property to the northwest): This facility is registered with eight No. 2 fuel oil USTs ranging in size from 500 gallons to 3,000 gallons. The eight tanks were removed by Consolidated Environmental Services in January 1990. A UST closure assessment was not required as the USTs were used for on-site heating fuel. In addition, a corresponding spill report was not identified by Haley Ward. This facility is not expected to have a negative environmental impact at the Subject Property due to its downgradient/cross gradient location relative to the Subject Property and a release was not documented in the files reviewed by Haley Ward.

UST #8278, Binax, Inc. 95 Darling Avenue (adjoining property to the southeast): This facility is registered with two 1,500-gallon No. 2 fuel oil USTs. One tank was removed by R.J. Grondin in 1987. The file indicated that no reported contamination was observed by the contractor during this removal. Tidewater Petroleum Services removed the second tank in 1992. A UST closure assessment was not required as the UST was used for on-site heating fuel. In addition, a corresponding spill report was not identified by Haley Ward. This facility is not expected to have a negative environmental impact at the Subject Property due to its downgradient/cross gradient location relative to the Subject Property and a release was not documented in the files reviewed by Haley Ward.

UST #4190, Canteen Corp, 76 Darling Avenue (adjoining to the northeast): This property is registered with one bare or asphalt coated steel 4,000-gallon No. 2 fuel oil UST which was removed in April of 1990. An UST closure assessment was not required as the UST was used for on-site heating fuel. In addition, a corresponding spill report was not identified by Haley Ward. This facility is not expected to have a negative environmental impact at the Subject Property because a release was not documented in the files reviewed by Haley Ward.

Local and state records did not identify Aboveground Storage Tanks (ASTs) currently or previously located at the Subject Property.

4.1.2.5 State and Tribal Voluntary Cleanup Sites

The database search did not identify the Subject Property as a MDEP Voluntary Response Action Program (VRAP) facility; however, three properties within a 0.5-mile radius of the Subject Property were identified as VRAP facilities. According to the database report, all three properties are closed with a remedy in place. These facilities are not expected to have a negative environmental impact at the Subject Property due to distance from the Subject Property and/or current regulatory status.

4.1.2.6 State and Tribal Brownfield Sites

The database search did not identify the Subject Property or properties within a 0.5-mile radius of the Subject Property as State or Tribal listed Brownfield sites.

4.1.2.7 Hazardous Material and Oil Spill Sites

The database search identified one spill incident at the Subject Property. An additional 31 spill incidents were identified within a 0.5-mile radius of the Subject Property. None of the 31 off-site incidents are expected to have a negative environmental impact at the Subject Property due to distance from and side or downgradient location relative to the Subject Property. The spill incident for the Subject Property is summarized below:

Spill #P-597-2016, 75 Darling Avenue (the Subject Property): According to the spill report, approximately 20 gallons of transformer oil leaked onto the ground and into a pit underneath the transformer when it was struck by a vehicle. The transformer was tagged as non-polychlorinated biphenyls containing. The oil that spilled onto the ground was cleaned up using sorbent material. The water/oil mixer in the pit under the transformer was pumped out and disposed of off-site. No further action was required by the MDEP. This spill is not expected to have a negative impact on the Subject Property.

4.2 Additional Environmental Record Sources

4.2.1 Database Search of Unmapped Properties

Unmapped properties located in the general vicinity of the Subject Property are included in the database search. However, due to inaccurate or missing information provided by the appropriate governmental agency, the database search contractor was unable to definitively plot the location of these properties or incidents.

The unmapped property list was reviewed in an attempt to definitively locate these properties. Based upon a practical review of the information, it was determined that no other properties within the vicinity of the Subject Property are listed as unmapped property.

4.2.2 Local Environmental Record Sources

Additional local records associated with the Subject Property were not identified or reviewed.

4.3 Physical Setting Sources

4.3.1 Topography and Surface Drainage

The United States Geological Survey (USGS) Portland West, Maine 7.5-minute Quadrangle Topographic Map indicates that the Subject Property is approximately 40 feet above mean sea level. The Subject Property and surrounding properties are relatively flat. **Figure 1** includes a topographic map of the Subject Property and the surrounding area.

4.3.2 Geology

According to the Bedrock Geologic Map of the Portland West Quadrangle, Maine (Open File No. 03-94, 2003), the Subject Property is underlain by the Spring Point formation which consists of quartz schist and amphibole. Bedrock outcrops were not observed on or in the vicinity of the Subject Property.

The Surficial Geologic Map of the Portland West Quadrangle, Maine (Open File No. 08-16, 2008) identifies the area of the subject property as being underlain by the Presumpscot Formation which consists of, "silt, clay, and minor sand deposited on the sea floor during late-glacial marine submergence."

4.3.3 Hydrology

4.3.3.1 Surface Water

Surface water bodies are not present at the Subject Property. The nearest water body to the Subject Property is Long Creek located approximately 100 feet west of the Subject Property.

4.3.3.2 Flood Zone

Federal Emergency Management Agency Flood Insurance Rate Map (FIRM) 2300530004C, effective August 17, 1981, indicates that the Subject Property is considered to be in an area of minimal flooding. Refer to **Appendix E** for excerpts of the FIRM depicting the Subject Property.

4.3.3.3 Wetlands

According to the National Wetlands Inventory (NWI) Map for the Portland, Maine area, wetlands are not present at the Subject Property. Refer to **Appendix F** for a copy of a map showing the NWI mapped wetlands located in close proximity to the Subject Property.

4.3.3.4 Hydrogeology

According to the Significant Sand and Gravel Aquifer Map for the Portland West Quadrangle, Maine (Open File No. 99-11, 1999), the Subject Property is not located on a Significant Sand and Gravel Aquifer.

4.4 Historical Use Information

Historical sources associated with the Subject Property and adjoining properties were reviewed to develop a history of the previous uses in order to help identify the likelihood of past uses having led to RECs at the Subject Property. Historical sources from the present to the Subject Property's first developed use or back to 1940 (whichever is earlier) were reviewed where available. The property was undeveloped prior to 1977, when the current structure was constructed. From 1977 thru 1998, various commercial companies occupied the building, including a bearing distribution company, janitorial supply company, mobile sound systems company, medical supplier, a plastic supply company, garden and landscaping company, and appliance parts company as well as offices for The Maine Safety Council. City Directories did not list the property from 2001 until 2018. After that time, the Subject Property was occupied by a financial services company and was used as office space.

The following subsections describe historical sources that were reviewed during the completion of this Phase I ESA.

4.4.1 Historical Aerial Photographs

Haley Ward obtained an aerial photograph report for the subject property and surrounding area were reviewed as listed in the table below:

AERIAL YEAR	SUBJECT PROPERTY	ADJOINING PROPERTIES
1956 - 1970	undeveloped	undeveloped
1972	undeveloped	Darling Avenue is present with a few structures
1975	undeveloped	Properties to the north are developed.
1986 - 2021	Developed with current structure	All adjoining properties are developed similar to current development

A copy of the aerial photograph report is included as **Appendix B**.

4.4.2 Historical Fire Insurance Maps

Sanborn Fire Insurance Rate Maps (Sanborn Maps) do not provide coverage of the subject property and the surrounding area.

Refer to **Appendix F** for a no coverage statement provided by EnviroSite.

4.4.3 Property Tax Files

The Subject Property consists of an approximately 2.1-acre parcel of land identified as Lot 17 on the City of South Portland Property Tax Map 48. Copies of the Subject Property's Property Tax Files are included in **Appendix G**.

Adjoining properties consist of residential, commercial, and charitable parcels. A summary of adjoining properties and their current uses are listed below.

OWNER	MAP/LOT	DIRECTION RELATIVE TO SUBJECT PROPERTY	CURRENT USE
53 Darling Ave LLC	48/18	Northwest	Offices
My Darling, LLC	48/15A	Southeast	Offices
Herbert Ginn	68/6E	Southwest	Vacant
Ward Hill Realty Associates	68/6B	Southwest	Undeveloped
Gilman Family Realty Trust	48/12A	Northeast	Commercial
Darling LLC	48/6	Northeast	Warehouse

4.4.4 Property Transaction Records

Haley Ward reviewed on-line property transaction records for the Subject Property in the form of deeds at the Cumberland County Registry of Deeds website on October 21, 2022. The compiled information was used to evaluate historical property ownership and land use and does not represent a legal title search. A legal description for the Subject Property is recorded in the Cumberland County Registry of Deeds on Page 53 of Book 39245 and is currently owned by 75 Darling Preble Street LLC. Historical ownership of the Subject Property is summarized below. A copy of the current deed is included in **Appendix G**.

OWNER	BOOK/PAGE	DATE OF TRANSACTION
75 Darling Preble Street LLC	39245/73	March 3, 2022
75 Darling Ave, LLC et al	34478/230	November 20, 2017
75 Darling Ave Irrevocable Tryst	29329/68	January 21, 2012
Cook Management Trust	7544/22	December 18, 1986
Alice E Cook	Unknown	Unknown

4.4.5 Historical Topographic Maps

Haley Ward obtained a Historical Topographic Map Report for the Subject Property including the years 1891, 1893, 1914, 1916, 1918, 1941, 1944, 1948, 1956, 1957, 2011, 2014, 2018, and 2021 from EnviroSite. The Subject Property and surrounding area appear undeveloped prior to 1970. After 1970, the type of development could not be determined due to the scale of the maps. Copies of the historical topographic maps are included in **Appendix F**.

4.4.6 Historical City Directories

Historical city directories of Darling Avenue were reviewed as listed in the table below:

DIRECTORY YEAR	SUBJECT PROPERTY	ADJOINING PROPERTIES
2018	Not Listed	Ascend Compound Laboratory, Briova RX, Dr. Newton Naturals, Media Power, Inc., SXC Health Solutions, Shing Star Fay Care, Av Technik
2015	ATM	Ascend Compound Laboratory, Briova RX, Dr. Newton Naturals, Media Power, Inc., SXC Health Solutions, Shing Star Fay Care, Av Technik
2001	Not Listed	Mermaid Transportation, Dakota Systems, National Rental Car
1998	A Special Place, Interior Gardens, Johnson Janitorial Supplies, Kaman Industrial Technologies, Maine Safety Council, Pine Tree Mobile	Aucocisco Day School, Coastal Mechanical, Genesis II Corp, Habit Management, Tupperware Home Parties, Mermaid Transportation, National Rental Car, Dakota Systems
1993	Pine Tree Mobile, Johnson Janitorial Supplies, Kaman Industrial Technologies	Fair Foods and Produce, Johnson Controls, Alpha Business Systems, Binax, Patterson Dental, Center for Grieving Children, Mermaid Transportation, Maine Teachers Association, Portland Teachers Association
1988	Borden A E Co Inc, The Boyd Corp, Jasco Distributors, Johnson Janitorial Supplies, Kaman Bearing, Twin City Supply, Plastic Supply Inc, Pine Tree Mobile, Harlan Spiller CO.	Alpha Business Systems, C&R Tile, Boyd Gordon & Co, Johnson Controls, Fair City Foods and Produce, JJ Crimmings Co, Eagle Snacks, Canteen Service Corp, Mermaid Transportation, Spillane Car Rental

The historical city directories indicate that the Subject property has been occupied by several different commercial companies from 1988 until 1998. Copies of the Historical City Directories are included in **Appendix F**.

4.4.7 Code Enforcement Files

Haley Ward reviewed files available at the City of South Portland Code Enforcement Office on October 21, 2022. Current environmental concerns or code violations associated with properties in the vicinity of the Subject Property were not identified in the files reviewed.

4.4.8 Other Historical Sources

The 1891 Topographic Map, Portland, Maine Sheet depicts the Subject Property as undeveloped. A copy of the Map is included in **Appendix F**.

SECTION 5 | ENVIRONMENTAL SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Haley Ward completed an on-site visual reconnaissance of the Subject Property on October 21, 2022. Haley Ward's reconnaissance consisted of a systematic tour to visually observe Subject Property improvements and grounds. Haley Ward also attempted to visually assess exterior portions of adjoining properties observable from within the boundaries of the Subject Property.

Limiting conditions were not encountered at the time of the Subject Property visit that would prevent the assessment of potential environmental impacts to the Subject Property.

The following sections regarding the general Subject Property setting are intended to address those items listed in Sections 9.4.1 through 9.4.4.7 in ASTM E 1527-13 and the applicable sections of ASTM 1527-21. The items listed below were visually observed during the October 21, Subject Property visit by Haley Ward and have not been discussed in previous sections of this Phase I ESA.

5.2 Subject Property Conditions

5.2.1 Hazardous Substances and Petroleum Products

Hazardous substances observed at the Subject Property include household quantities of paints and household cleaners. These materials are stored in maintenance and utility closets.

5.2.2 Storage Tanks

5.2.2.1 Aboveground Storage Tanks (ASTs)

ASTs were not observed at the time of the Subject Property visit.

5.2.2.2 Underground Storage Tanks (USTs)

Visual evidence of the presence or potential presence of USTs (e.g., fill pipes, concrete vaults, etc.) was not observed at the Subject Property.

5.2.3 Strong, Pungent, or Noxious Odors

Strong, pungent, or noxious odors indicative of hazardous substances and/or petroleum product releases were not identified at the time of the Subject Property visit.

5.2.4 Pools or Sumps Containing Liquid

Pools or sumps containing liquids, unidentified oil, or hazardous materials were not observed at the time of the Subject Property visit.

5.2.5 Drums

Drums were not observed at the time of the Subject Property visit.

5.2.6 Unidentified Substance Containers

Unidentified substance containers were not observed on the Subject Property during the Subject Property visit.

5.2.7 Polychlorinated Biphenyls (PCBs)

PCB-containing building materials such as caulks and sealants were commonly available and used from 1950 to 1978. Based on the age of the on-site structure (initially constructed circa 1908), PCB-containing building material may have been used during construction, renovations, or repairs of the on-site structure.

Potential PCB-containing materials were not observed at the time of the Subject Property visit.

5.2.8 Pits, Lakes, or Lagoons

Waste disposal and/or waste treatment pits, lakes, or lagoons or evidence of their presence (e.g., staining, corrosion) were not observed at the Subject Property at the time of the Subject Property visit.

5.2.9 Stained Surfaces or Distressed Vegetation

Surface staining and/or distressed vegetation was not observed at the Subject Property.

5.2.10 Underground Structures

Underground structures present at the Subject Property include sub-surface water, sewer, and natural gas utility lines.

5.2.11 Floor Drains and Sumps

Floor drains and sumps were not observed within the Subject Property building.

5.2.12 Heating and Cooling

The building is heated by a forced hot air heating system fueled by natural gas and is equipped with a central air conditioning system.

5.2.13 Solid Waste Disposal

Solid waste generated at the Subject Property is collected and disposed of in an on-site dumpster.

5.2.14 Wastewater Disposal

Sanitary wastewater is discharged to the municipal sanitary sewer system.

5.2.15 Wells

Water supply wells were not observed and are not known to exist at the Subject Property.

5.2.16 Septic Systems

The Subject Property is connected to the municipal sewer system. Evidence of an on-site septic system was not observed at the Subject Property.

5.2.17 Universal Waste

Universal waste was not observed during the Subject Property visit.

5.3 Other Observed Subject Property Conditions

Other conditions were not observed during the Subject Property visit.

SECTION 6 | INTERVIEWS

6.1 Interview with Subject Property Owner

The Subject Property owner was not available for an interview; however, the Vice President of Operations for Preble Street, Mr. Christopher Saunders (representing the Owner) was interviewed regarding his knowledge of the Subject Property. Refer to **Section 6.2** for information provided by Mr. Saunders.

6.2 Interview with Subject Property Manager

Mr. Saunders is considered the Subject Property Manager. Information obtained from Mr. Saunders has been included in the appropriate sections of this report.

6.3 Interview with Occupants

Haley Ward did not interview occupants of the Subject Property as part of this Phase I ESA.

6.4 Interview with Local Government Officials

Haley Ward did not interview local government officials as part of this Phase I ESA.

6.5 User Interview

Haley Ward received a User Questionnaire prepared by Mr. Christopher Saunders on behalf of Preble Street dated November 9, 2022. The User indicated that they are aware that a portion of the property has previously been used as offices. The User indicated that they are not aware of any significant issues or AULs associated with the Subject Property. A copy of the completed User Questionnaire is included in **Appendix H**.

6.6 Interviews with Others

Haley Ward did not conduct additional interviews as part of the Phase I ESA.

SECTION 7 | ADDITIONAL SERVICES

7.1 Vapor Encroachment Screening

In accordance with ASTM E 2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, a supplemental (Tier 1) assessment of the Subject Property was completed as part of the Phase I ESA investigation to identify potential Vapor Encroachment Conditions (VECs) at the Subject Property. The purpose of the Tier 1 assessment is to conduct a non-invasive, initial screen of the Subject Property, including review of historic information to determine if potential VECs are present in connection with the Subject Property.

Based on the Tier 1 Vapor Encroachment Screening of the Subject Property, a VEC cannot be ruled out as petroleum impacted soil associated with former USTs may remain on the Subject Property and/or adjoining properties.

7.2 Asbestos-Containing Materials

An inspection and laboratory analyses for Asbestos-Containing Materials (ACM) is beyond the scope of this Phase I ESA; however, pursuant to 29 Code of Federal Regulations (CFR) 1926.1101, for buildings constructed prior to 1980, all suspect building materials are assumed to contain asbestos until laboratory analysis proves otherwise. In addition, MDEP regulations require testing or assumption of positive for suspect materials that may be disturbed during renovation, demolition, and/or maintenance activities unless documentation are available showing the materials are non-ACM. Based on the age of construction of the on-site structure (1977); ACM may be present in the Subject Property building.

7.3 Lead-Based Paint

An inspection, sampling, and laboratory analysis for the presence of Lead-Based Paint (LBP) is beyond the scope of this Phase I ESA. The use of LBP was discontinued in 1978. Based on the age of the on-site structure (1977); LBP may have been used in the original construction.

SECTION 8 | FINDINGS AND OPINION

During the completion of this Phase I ESA, the following were identified at the Subject Property:

- The Subject Property was initially developed in 1977 with the current structure.
- The Subject Property was purchased by 75 Darling Preble Street LLC in 2022 and has operated as a food security hub from that point on.
- Eight USTs were formerly located on the Subject Property. Haley Ward was unable to identify documentation regarding their removal in 1990.
- Adjoining properties have historically consisted of commercial development.
- ACM and/or LBP may be present in the Subject Property building due to the age of the structure.

During the completion of this Phase I ESA, known or suspected Historical Recognized Environmental Conditions (HRECs), Controlled Recognized Environmental Conditions (CRECs), and/or *de minimis* conditions were not identified.

The following Recognized Environmental Condition (REC) was identified during completion of this Phase I ESA:

- Although a corresponding spill report was not identified by Haley Ward for the UST removals in 1990, the potential exists for petroleum contamination at the Subject Property.

The following other environmental concern was identified during completion of this Phase I ESA:

- ACM and/or LBP may be present in the Subject Property building due to the age of the structure.

Based on the Tier 1 Vapor Encroachment Screening of the Subject Property, a VEC cannot be ruled out as petroleum impacted soil associated with former USTs may remain on the Subject Property.

Based on the investigations conducted for this Phase I ESA, conditions indicative of releases or threatened releases of hazardous substances, pollutants, contaminants, petroleum or petroleum products, and/or controlled substances on, at, in, or to the Subject Property were identified at the Subject Property.

SECTION 9 | SIGNIFICANT DATA GAPS

Significant data gaps were not identified as part of this Phase I ESA that would affect our ability to identify RECs.

SECTION 10 | LIMITING CONDITIONS AND DEVIATIONS

Limiting conditions were not encountered at the time of the Subject Property visit that would prevent the assessment of potential environmental impacts to the Subject Property.

SECTION 11 | CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13, incorporating procedures set forth in ASTM Standard E 1527-21, of the 1 Hatley Road Property located in Portland, Maine, the Subject Property. Any exceptions to, or deletions from, this practice are described in **Section 1** of this report. This assessment has revealed the following RECs, CRECs, and/or significant data gaps in connection with the subject property:

This assessment has revealed no evidence of HRECs, CRECs, or significant data gaps in connection with the subject property.

The following REC was identified during completion of this Phase I ESA:

- Although a corresponding spill report was not identified by Haley Ward for the UST removals in 1990, the potential exists for petroleum contamination at the Subject Property.

The following other environmental concern was identified during completion of this Phase I ESA:

- ACM and/or LBP may be present in the Subject Property building due to the age of the structure.

SECTION 12 | RECOMMENDATIONS

Haley Ward makes the following recommendations based on the results of the Phase I ESA:

- Sub-slab vapor sampling should be completed at the Subject Property to determine if residual petroleum impacted soil at the Subject Property or adjoining properties is negatively affecting indoor air quality at the Subject Property.
- If plans call for the renovation of any portion of the Site building, a Hazardous Materials Inventory should be completed.
- Although petroleum impacted soil likely exists at the Subject Property, there are currently no receptors that may be exposed to these soils. If future development at the Subject Property includes soil disturbance, a soil management plan should be developed to address the proper handling and disposal of soils excavated from the Subject Property.

SECTION 14 | SIGNATURE AND QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL(S)

Haley Ward performed services in a manner consistent with the guidelines set forth in the ASTM E 1527-13 Standard and incorporating the procedures prescribed in the ASTM E 1527-21 Standard.

We declare that, to the best of [my, our] professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 C.F.R. § 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Individual qualifications for Haley Ward personnel performing work associated with this Phase I ESA are included in **Appendix I**.

All information contained in this report are based on data available from various public, government and other sources and are based upon the best data available from those sources. The information available in this report may be available from other sources and is not exclusive or the exclusive property of EnviroSite Corporation.

NO WARRANTY EXPRESSED OR IMPLIED, IS MADE IN CONNECTION WITH THIS REPORT, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. ALL RISK IS ASSUMED BY USER AND EnviroSite assumes no liability for faulty or inaccurate information. The Reports may utilize a variety of public and other sources reasonably available to EnviroSite. EnviroSite cannot, and does not assure, warrant, guarantee or assume any liability for the correctness, comprehensiveness, timeliness or completeness of any of such information, nor is the information in any Report to be construed as legal advice with respect to environmental risks associated with any property. EnviroSite shall not be liable to anyone for any claims, causes of action, suits, damages, losses, costs and expenses (including, without limitation, attorneys' fees and costs) arising out of or caused by this report regardless of the acts, errors or omissions, or negligence of EnviroSite. Any damages shall be limited to the purchase price of the report.

Purchaser of the report accepts the report "As Is". The report is intended only to provide information only and should not be considered as providing any legal advice, prediction, forecast, or fact as to the environmental risk for any specific property. Reports are proprietary to EnviroSite, and contain copyrighted material and trademarks of EnviroSite. All other trademarks used herein are the property of their respective owners. All rights of EnviroSite as to the Reports are reserved.

Envirosite Corporation has conducted a search of all reasonably ascertainable records in accordance with EPA's AAI (40 CFR Part 312) requirements and the ASTM E-1527-21 Environmental Site Assessments standard.

SUBJECT PROPERTY INFORMATION:

ADDRESS:

75 Darling Ave
75 Darling Ave
South Portland, ME 04106

COORDINATES:

Latitude (North):	43.640772 - 43°38'26.8"

Tank Details

Date Tank Installed : 1979-12-01
 Tank Number : 1
 Tank Status Date : 1987-06-01
 Tank Status : REMOVED
 Tank Sub Status : N/R
 Tank Volume in Gallons : 1500
 Tank Material : STEEL - BARE OR ASPHALT COATED.
 Tank Leak Detection : UNKNOWN
 Tank Above Below : BELOWGROUND
 Federal Regulated : N
 Chamber ID : 1
 Product Stored : #2 FUEL OIL
 Chamber Pump Type : UNKNOWN
 Pipe Date Installed : N/R
 Piping Status Date : 1987-06-01
 Piping Status : REMOVED
 Pipe Material : GALVANIZED STEEL
 Volume in Gallons : 1500
 Pipe Leak Detection : UNKNOWN

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

SPILLS - ME

Facility Name : MAINE GOLD & SILVER
 Facility Address : 50 MAINE MALL ROAD, SOUTH PORTLAND, ME

Spill Number : P-703-2013
 Actual Spill Date : 2013-09-07
 Report Status : Final Report
 Spill Type : Hazardous Material Incident
 Location State Province : ME
 Incident Location : Business - Commercial
 Incident Source : Storage Unit - Box or Other General Use Container
 Spill Cause : Accident - Human Error
 Agency Hyperlink : [Click here for hyperlink provided by the agency.](#)
 Last Date in Agency List : 2022-10-14

Medium(s) : Interior Surface

Spill Logs

Log Location Description : Maine Gold & Silver 50 Maine Mall Rd
 Log Location Town : SOUTH PORTLAND
 Log Tank Involved : None
 Log Note : nitric acid spilled at work station in hooded/vented space

Products Found

Product Code : CORROSIVE
 Product Amount : 1 oz.

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring. The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

FRS **(cont.)**

The RMP database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
 TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

(E-GGRT, accessible through an EPA web page, is used to submit annual reports in support of the EPA rule for mandatory reporting of greenhouse gases (GHG) by large GHG emissions sources. Implementation of 40 CFR part 98 is referred to as the greenhouse gas reporting program (GHGRP). This comprehensive, nationwide emissions data will provide a better understanding of the sources of GHGs and will guide development of the policies and programs to reduce emissions. The publically available data will allow reporters to track their own emissions, compare them to similar facilities, and aid in identifying cost effective opportunities to reduce emissions in the future.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

 Contact Non-US State : N/R
 Contact Country : US
 Preparer of Incident Report : Carrier

Description of Events :

During the loading proces the loading hose jumped when air was drawn through the hose. The movement of the hose coupled with the very low ambient temperatures caused a crack to form in the CPVC elbow at the cargo tank inlet. In addition the primary tank closure valve (internal valve) failed to seal completely allowing the passage of material into the elbow and out through the crack. Three cracks formed in the elbow proper along the rearward-facing vertical run of the elbow (see photos). Vacuum was applied to the tank vessel to retain the material until a suitable trailer could arrive on-scene for transfer of the material.

Recommendations/Actions Taken :

Following discussion with the trailer and valve manufacturers additional support and isolation brackets are being added to the trailer of similar design in the transporter's fleet and a modification of the valve control system is being retrofitted so as to provide for positive physical closure of the primary valve in addition to the fail-safe spring closure system.

LAST - ME

Facility Name : FAIRCHILD SEMI-CONDUCTOR
 Facility Address : 333 WESTERN AVE, SOUTH PORTLAND, ME

Spill Number : P-982-2002
 Actual Spill Date : 2002-12-23
 Report Status : Final Report
 Location Town MCD : 05220
 Number of Wells at Risk : 0
 Number of Wells Impacted : 0
 Material Disposal Information : waste managed by Union Oil
 Further Response Action : F
 Spill Type : Oil Incident
 Report Type : Subject/Spiller
 Detection Method : Visual Product
 Incident Location : Business - Industrial
 Incident Source : Storage Unit - Aboveground Storage Tank
 Spill Cause : Overfill
 Agency Hyperlink : [Click here for hyperlink provided by the agency.](#)
 Last Date in Agency List : 2022-10-14

Medium(s) : Land

Spill Logs

Spill Office : Portland
 Spill Office Sequence Number : 982
 Spill Year : 2002
 Log Spill Date : 2002-12-23
 Log Reported Date : 2002-12-23
 Log Reported Product : DIESEL
 Log Location Description : Fairchild Semiconductor Co. 33 Western
 Log Location Town : SOUTH PORTLAND
 Log Tank Involved : Above Ground Tank(s) Involved
 Log Note : Overfill of AST by Union Oil Co.

Products Found

Product Code : DIESEL
 Other Product : N/R

Reported Chemical Information

Reporting Year : 2020
 Document Control Number : 1320218786869
 CAS Number : 7664-93-9

Chemical Name : Sulfuric acid (acid aerosols including mists, vapors, gas, fog, and other airborne forms of any particle size)

Unit of Measure : Pounds
 Maximum Amount Onsite : 01

Reporting Year : 2020
 Document Control Number : 1320218786832
 CAS Number : 7647-01-0

Chemical Name : Hydrochloric acid (acid aerosols including mists, vapors, gas, fog, and other airborne forms of any particle size)

Unit of Measure : Pounds
 Maximum Amount Onsite : 03

Reporting Year : 2020
 Document Control Number : 1320218786857
 CAS Number : 7697-37-2
 Chemical Name : Nitric acid
 Unit of Measure : Pounds
 Maximum Amount Onsite : 03

Reporting Year : 2020
 Document Control Number : 1320218786844
 CAS Number : 7664-39-3
 Chemical Name : Hydrogen fluoride
 Unit of Measure : Pounds
 Maximum Amount Onsite : 03

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description : AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements. TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Waste Activity Monitoring

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your EnviroSite account representative for a complimentary site report containing all of the details available.

Report Cycle : 2019
 Hazardous Waste Page Number : 1
 Hazardous Waste Sub-Page Number : 1
 BR Form : GM
 Waste Description : ARSENIC DEBRIS
 Primary NAICS : 334413 - Semiconductor and Related Device Manufacturing

Source Code : G09 - Other production or service-related processes from which the waste is a direct outflow or result (specify in comments)

Form Code : W319 - Other inorganic solids (specify in comments)

Management Method : H040 - Incineration - thermal destruction other than use as a fuel (includes any preparation prior to burning)

Generation Tons : 0.054
 Managed Tons : 0
 Shipped Tons : 0.054
 Received Tons : 0
 Receiver ID : ARD069748192
 Receiver State : AR
 Shipper ID : MED001098458
 Shipper State : ME
 Waste Minimization : X - No waste minimization efforts were implemented for this waste
 Waste Code List : D004
 Waste Code Group : D004 - ARSENIC
 Waste Generation Type : N/R

Report Cycle : 2019
 Hazardous Waste Page Number : 10
 Hazardous Waste Sub-Page Number : 1
 BR Form : GM
 Waste Description : DEBRIS WITH ACIDS/LIQUID
 Primary NAICS : 334413 - Semiconductor and Related Device Manufacturing

Map Id: M48
 Direction: E
 Distance: 0.400 mi., 2113 ft.
 Elevation: 57 ft.
 Relative: Lower

EnviroSite ID: 3211911
 EPA ID: N/R

Complaint Summary

Respondent/Defendant Name : NATIONAL SEMICONDUCTOR CORPORATION
 Named in Complaint : Y
 Named in Final Order : Y

SEP Category : Pollution Prevention

SEP Description :

RESPONDENT HAS AGREED TO INSTALL AND OPERATE FOR AT LEAST THREE YEARS AN AUTOTITRATION SYSTEM IN THE COBALT SILICIDE REMOVAL PROCESS PHASE OF ITS SILICON WAFER PRODUCTION. THE AUTOTITRATION SYSTEM WILL AUTOMATICALLY MONITOR AND ASSESS THE VIABILITY OF PHOSPHORIC ACID AND HYDROGEN PEROXIDE USED TO REMOVE A COBALT SILICIDE COATING FROM THE WAFERS, AND DETERMINE THE POINT AT WHICH THE CHEMICAL MIXTURE IS SO CONTAMINATED THAT IT MUST BE REPLACED. INCREASING THE PRECISION OF THIS STEP IN THE PROCESS THROUGH THE SEP WILL DECREASE THE FACILITY'S USAGE OF THESE TOXIC ACIDS, INCLUDING THE SODIUM HYDROXIDE USED TO NEUTRALIZE THEM, BY AT LEAST 20%.

SEP Category : Pollution Prevention/Equipment-Technology Modification

SEP Description :

RESPONDENT HAS AGREED TO INSTALL AND OPERATE FOR AT LEAST THREE YEARS AN AUTOTITRATION SYSTEM IN THE COBALT SILICIDE REMOVAL PROCESS PHASE OF ITS SILICON WAFER PRODUCTION. THE AUTOTITRATION SYSTEM WILL AUTOMATICALLY MONITOR AND ASSESS THE VIABILITY OF PHOSPHORIC ACID AND HYDROGEN PEROXIDE USED TO REMOVE A COBALT SILICIDE COATING FROM THE WAFERS, AND DETERMINE THE POINT AT WHICH THE CHEMICAL MIXTURE IS SO CONTAMINATED THAT IT MUST BE REPLACED. Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description :

(E-GGRT, accessible through an EPA web page, is used to submit annual reports in support of the EPA rule for mandatory reporting of greenhouse gases (GHG) by large GHG emissions sources. Implementation of 40 CFR part 98 is referred to as the greenhouse gas reporting program (GHGRP). This comprehensive, nationwide emissions data will provide a better understanding of the sources of GHGs and will guide development of the policies and programs to reduce emissions. The publically available data will allow reporters to track their own emissions, compare them to similar facilities, and aid in identifying cost effective opportunities to reduce emissions in the future.

Source Description :

CEDRI is the EPA Compliance and Emissions Data Reporting Interface and combines data about emissions source tests, continuous emissions monitoring, and compliance and emissions reports.

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information.

Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring. The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Description of Events :

AT 18:00 STEVE SMITH(SUPERVISOR) NOTIFIED ME THAT A PACKAGE WAS LEAKING IN THE SORT ISLE. NOT KNOWING WHAT THE PACKAGE WAS I PUT ON MY GLOVES APRON GOGGLES AND BOOTS AND IDENTIFIED THE LEAKING PACKAGE AS A CORROSIVE LIQUID. USING THE DECISION TREE AND RESPONSE SHEETS I RESPONDED TO THE SPILL WITH THE SPILL CART AND PPE EQUIPMENT. I PLACED THE PACKAGE IN A TUB AND CLEANED UP THE SPILLED PRODUCT WITH SPEEDY DRY. I RETURNED TO DMP AREA AND PROCESSED THE SPILL ACCORDING TO THE RESPONSE SHEETS. I COMPLETED THE DOCUMENTATION AFTER THE CLEAN UP.

Description of Events :

AT 6:00 PM ON SEPTEMBER 27 1996 I RESPONDED AFTER CONSULTING THE DECISION TREE AND CORROSIVE LIQUID RESPONSE SHEET. WITH PROPER PPE. THE ORIGINAL PH TEST 4 AND NEUTRALIZED WITH SODIUM BICARBONATE TO PH 7. CLEAN UP REST OF LIQUID WITH SPEEDI-DRI. PLACED PACKAGE IN SPILL TUB AND PROCESSED THROUGH DMP PROGRAM. PACKAGE WAS LOCATED IN THE UNLOAD IN TRAILER REA 2213994 ON DOOR 10 I WAS WEARING GLOVES GOGGLES AND APRON BOOTS. I PLACED THE PACKAGE IN A SPILL TUB USING SPEEDY-DRI TO CLEAN UP ANY SPILL AND THE PACKAGE WAS THEN BROUGHT TO THE HAZARDOUS CAGE FOR PROPER DISPOSAL AND CLEAN UP.

Description of Events :

AT 18:20 MIKE PATTERSON (SUPERVISOR) FOUND THE LEAKING PACKAGE INSIDE A TRAILER. HE THEN BROUGHT IT TO THE DMP AREA AND IDENTIFIED IT AS DICHLOROMETHANE. AT 20:45 ED DAVIS (FIRST RESPONDER) TOOK THE LEAKING CONTAINER TO A TABLE IN THE DMP AREA WHERE HE THEN REFERRED TO THE DECISION TREE AND CONTINUED TO PROCESS THE PACKAGE USING THE NEEDED PPE EQUIPMENT AND ABSORBENT. HE TIGHTENED A LOOSE CAP ON THE LEAKING CONTAINER AND SENT TO THE SHIPPER AND DISPOSED OF CONTAMINATED CARDBOARD THROUGH THE DMP PROGRAM.

Classification : Large Quantity Generator

Description :

Handlers that generate 1,000 kg or more of hazardous waste during any calendar month; or generate more than 1 kg of acutely hazardous waste during any calendar month; or generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1 kg of acutely hazardous waste at any time; or generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Reported Chemical Information

Reporting Year : 2020
 Document Control Number : 1320218962557
 CAS Number : N511

Chemical Name : Nitrate compounds (water dissociable; reportable only when in aqueous solution)

Unit of Measure : Pounds
 Maximum Amount Onsite : 01

Reporting Year : 2020
 Document Control Number : 1320218962583
 CAS Number : 7664-93-9

Chemical Name : Sulfuric acid (acid aerosols including mists, vapors, gas, fog, and other airborne forms of any particle size)

Unit of Measure : Pounds
 Maximum Amount Onsite : 01

Reporting Year : 2020
 Document Control Number : 1320218962544
 CAS Number : 7664-39-3
 Chemical Name : Hydrogen fluoride
 Unit of Measure : Pounds
 Maximum Amount Onsite : 04

Reporting Year : 2020
 Document Control Number : 1320218962520
 CAS Number : 7664-41-7
 Chemical Name : Ammonia
 Unit of Measure : Pounds
 Maximum Amount Onsite : 04

Reporting Year : 2020

Source Description

Source Description :

The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
 Source Description :

The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.
 The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
 Source Description : The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.
 The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FRS (cont.)

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Description of Incident : THE CALLER IS REPORTING A 5 POUNDS OF PCB RELEASED FROM THE
 WINDOWS ONTO THE GROUND AND NONE REACHED WATER. THE
 CALLER STATED THAT THIS INCIDENT OCCURRED IN A OFFICE BUILDING.

Last Date in Agency List : 2015-12-23

Incident Response Summary

Date Time Received : 2014-09-26 11:53:10
 Date Time Completed : 2014-09-26 12:01:46

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

FRS (cont.)

Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

Source Description

Source Description :

CEDRI is the EPA Compliance and Emissions Data Reporting Interface and combines data about emissions source tests, continuous emissions monitoring, and compliance and emissions reports. The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description : CEDRI is the EPA Compliance and Emissions Data Reporting Interface and combines data about emissions source tests, continuous emissions monitoring, and compliance and emissions reports. The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

OSHA-OIS

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description : ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring. The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

FRS (cont.)

Source Description :

The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.

Source Description

Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

FRS (cont.)

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FRS (cont.)

Source Description : The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.
 The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

 Classification : Large Quantity Generator

Description :

Handlers that generate 1,000 kg or more of hazardous waste during any calendar month; or generate more than 1 kg of acutely hazardous waste during any calendar month; or generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1 kg of acutely hazardous waste at any time; or generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Last Date in Agency List : 2022-09-27

Owner/Operator Summary

Owner/Operator Name : RICHARD ATKINSON

Waste Activity Monitoring

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Report Cycle : 2019
 Hazardous Waste Page Number : 1
 Hazardous Waste Sub-Page Number : 1
 BR Form : GM
 Waste Description : CYANIDE FILTERS
 Primary NAICS : 332813 - Electroplating, Plating, Polishing, Anodizing, and Coloring

Source Code : G16 - Oil changes and filter or battery replacement (automotive, machinery, etc)

Form Code : W310 - Filters, solid adsorbents, ion exchange resins and spent carbon (usually from production, intermittent processes, or remediation)

Management Method : H132 - Landfill or surface impoundment that will be closed as landfill (to include prior treatment and/or stabilization)

Generation Tons : 0.95
 Managed Tons : 0
 Shipped Tons : 0.95
 Received Tons : 0
 Receiver ID : RID040098352
 Receiver State : RI
 Shipper ID : MED980910053
 Shipper State : ME

Waste Minimization : N - Waste minimization efforts were unsuccessful in reducing quantity and/or toxicity (please detail reasons in the Comments section)

Waste Code List : D007, F006, F008
 Waste Code Group : F6_9 - F006-F009 combinations
 Waste Generation Type : N/R

Map Id: O68
 Direction: WNW
 Distance: 0.917 mi., 4840 ft.
 Elevation: 81 ft.
 Relative: Higher

Report Cycle : 2019
 Hazardous Waste Page Number : 10
 Hazardous Waste Sub-Page Number : 1
 BR Form : GM
 Waste Description : OXIBLACK SOLUTION
 Primary NAICS : 332813 - Electroplating, Plating, Polishing, Anodizing, and Coloring

Source Code : G13 - Cleaning out process equipment (periodic sludge or residual removal from enclosed processes including internal scrubbing or cleaning)

Form Code : W119 - Other inorganic liquid (specify in comments)

Management Method : H070 - Chemical treatment (reduction / destruction / oxidation / precipitation)

Generation Tons : 3.05
 Managed Tons : 0
 Shipped Tons : 3.05
 Received Tons : 0
 Receiver ID : RID040098352
 Receiver State : RI
 Shipper ID : MED980910053
 Shipper State : ME

Waste Minimization : N - Waste minimization efforts were unsuccessful in reducing quantity and/or toxicity (please detail reasons in the Comments section)

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description

Source Description :

AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. CEDRI is the EPA Compliance and Emissions Data Reporting Interface and combines data about emissions source tests, continuous emissions monitoring, and compliance and emissions reports.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

OSHA-OIS

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Hazardous Waste Summary
 Waste Code / Name :

D001 - IGNITABLE WASTE
 D002 - CORROSIVE WASTE
 D007 - CHROMIUM
 D011 - SILVER
 F006 - WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
 F007 - SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.
 F008 - PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Source Description

Source Description :	The ME-EFIS, managed by the Department of Environmental Protection (DEP), integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas.

FRS (cont.)

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Description of Events :

THE BOX WAS FOUND LEAKING A PETROLEUM-BASED LIQUID. I CALLED THE SHIPPER WHO ASSURED ME THE STODDARD SOLVENT WAS NOT REGULATED. I ASKED FOR THE MSDS TO BE FAXED TO ME. THE FLASHPOINT TURNED OUT TO BE IN THE 110 DEGREE F RANGE. I INFORMED THE SHIPPER IT WAS REGULATED AS A DANGEROUS GOODS. THE FAA WAS NOTIFIED. THERE WERE NO MARKINGS LABELING SHIPPING PAPERS OR OTHER INDICATORS TO LEAD US TO BELIEVE THE CONTENTS WERE REGULATED.

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 07/22/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 800-424-9346
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 07/22/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 800-424-9346
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

EPA SAA: Listing of Sites with Superfund Alternative Approach Agreements.

Agency Version Date: 11/01/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 800-424-9346
Planned Next Contact: 10/19/2022	Most Recent Contact: 07/21/2022

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 07/22/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: 703-603-8712
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 07/22/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 07/22/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 09/19/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 202-566-1667
Planned Next Contact: 12/15/2022	Most Recent Contact: 09/19/2022

HIST CORRACTS 2: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases that are no longer in current agency list.

Agency Version Date: 10/12/2018	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Annually	Agency Contact: 202-566-1667
Planned Next Contact: 11/14/2022	Most Recent Contact: 08/17/2022

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 07/22/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Agency Version Date: 07/22/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

Planned Next Contact: 11/07/2022	Most Recent Contact: 08/11/2022

HIST SSTS: List of tracking of facilities who produce pesticides and their quantity that are no longer in current agency list.

Agency Version Date: 02/13/2019	Agency: Environmental Protection Agency
Agency Update Frequency: Annually	Agency Contact: (202) 566-1667
Planned Next Contact: 10/26/2022	Most Recent Contact: 07/29/2022

HOSPITALS: List of major Hospitals

Agency Version Date: 10/07/2022	Agency: DHS Homeland Infrastructure Foundation
Agency Update Frequency: Varies	Agency Contact: N/R
Planned Next Contact: 01/05/2023	Most Recent Contact: 10/07/2022

ICIS: Comprised of all Federal Administrative and Judicial enforcement information [intended to replace PCS] by tracking enforcement and compliance information (also contains what used to be known as FFTS)

Agency Version Date: 09/16/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: (202) 566-1667
Planned Next Contact: 12/13/2022	Most Recent Contact: 09/16/2022

INACTIVE PCS: Inactive Permitted facilities to discharge wastewater

Agency Version Date: 09/16/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: (202) 564-6582
Planned Next Contact: 12/13/2022	Most Recent Contact: 09/16/2022

INDIAN RESERVATION: American Indian Lands from the Protected Areas Database (PAD-US)

Agency Version Date: 07/22/2022	Agency: United States Geologic Survey (USGS)
Agency Update Frequency: Varies	Agency Contact: 1-888-275-8747
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

LUCIS: Land Use Control Information Systems

Agency Version Date: 09/14/2022	Agency: Department of the Navy: BRAC PMO
Agency Update Frequency: Quarterly	Agency Contact: (619) 532-0900
Planned Next Contact: 12/12/2022	Most Recent Contact: 09/14/2022

LUCIS 2: Land Use Control Information Systems

Agency Version Date: 01/17/2018	Agency: Department of the Navy: BRAC PMO
Agency Update Frequency: No Longer Maintained	Agency Contact: (619) 532-0900
Planned Next Contact: 10/24/2022	Most Recent Contact: 07/28/2022

MANIFEST EPA: EPA Hazardous Waste Electronic Manifest System (e-Manifest)

Agency Version Date: 08/02/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: (202) 566-1667
Planned Next Contact: 10/28/2022	Most Recent Contact: 08/02/2022

OTHER ASCERTAINABLE RECORDS (cont.)

MINE OPERATIONS: Mine plants and operations for commodities monitored by the National Minerals Information Center of the USGS

Agency Version Date: 08/05/2022	Agency: USGS Mineral Resources Program
Agency Update Frequency: Varies	Agency Contact: (703) 648-5953
Planned Next Contact: 11/01/2022	Most Recent Contact: 08/05/2022

MINES: Mines Master Index Files

Agency Version Date: 09/19/2022	Agency: Department of Labor
Agency Update Frequency: Varies	Agency Contact: (202) 693-9400
Planned Next Contact: 12/15/2022	Most Recent Contact: 09/19/2022

MINES USGS: Listing of all active mines and mineral plants in 2003

Agency Version Date: 08/05/2022	Agency: USGS Mineral Resources Program
Agency Update Frequency: Varies	Agency Contact: (703) 648-5953
Planned Next Contact: 11/01/2022	Most Recent Contact: 08/05/2022

MLTS: Sites in possession/use of radioactive materials regulated by NRC

Agency Version Date: 07/15/2022	Agency: Nuclear Regulatory Commission
Agency Update Frequency: Varies	Agency Contact: (800) 397-4209
Planned Next Contact: 01/11/2023	Most Recent Contact: 10/13/2022

NPL AOC: Areas of Concern related to NPL remediation sites

Agency Version Date: 07/22/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: N/R
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

NPL LIENS: National Priority List of sites with Liens

Agency Version Date: 07/22/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: 703-603-8867
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

NURSING HOMES: List of Nursing Homes

Agency Version Date: 10/06/2022	Agency: DHS Homeland Infrastructure Foundation
Agency Update Frequency: Varies	Agency Contact: N/R
Planned Next Contact: 01/02/2023	Most Recent Contact: 10/06/2022

OSHA: OSHA's listing of inspections violations and fatality information

Agency Version Date: 06/20/2022	Agency: Occupational Safety & Health Administration
Agency Update Frequency: Varies	Agency Contact: 800-321-6742
Planned Next Contact: 12/12/2022	Most Recent Contact: 09/15/2022

PADS: Listing of generators transporters commercial store/ brokers and disposers of PCB

Agency Version Date: 07/22/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: (703) 308-8404
Planned Next Contact: 10/20/2022	Most Recent Contact: 07/22/2022

PCB TRANSFORMER: Disposal and Storage of Polychlorinated Biphenyl (PCB) Waste

Agency Version Date: 08/05/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: (703) 308-8404
Planned Next Contact: 11/01/2022	Most Recent Contact: 08/05/2022

OTHER ASCERTAINABLE RECORDS (cont.)

PCS ENF: Permitted facilities to discharge wastewater (Federal equivalent to NPDES)

Agency Version Date: 09/16/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: (202) 564-6582
Planned Next Contact: 12/13/2022	Most Recent Contact: 09/16/2022

PCS FACILITY: Permitted facilities to discharge wastewater (Federal equivalent to NPDES)

Agency Version Date: 09/16/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: (202) 564-6582
Planned Next Contact: 12/13/2022	Most Recent Contact: 09/16/2022

PFAS NPL: List of NPL sites with PFAS or PFOA contamination

Agency Version Date: 07/26/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 01/12/2023	Most Recent Contact: 10/17/2022

PFAS TRIS: List of TRIS sites where PFAS or PFOA are used/manufactured/ treated/ transported/released.

Agency Version Date: 09/16/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: (202) 566-1667
Planned Next Contact: 12/13/2022	Most Recent Contact: 09/16/2022

PFAS UCMR3: List of PWS wells sampled for Unregulated Contaminant Monitoring Rule (UCMR)

Agency Version Date: 06/02/2022	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 11/24/2022	Most Recent Contact: 08/29/2022

PRISONS: List of Prison facilities

Agency Version Date: 09/02/2022	Agency: DHS Homeland Infrastructure Foundation
Agency Update Frequency: Varies	Agency Contact: N/R
Planned Next Contact: 11/29/2022	Most Recent Contact: 09/02/2022

RAATS: Listing of major violators with enforcement actions issued under RCRA. Includes administrative and civil actions filed by the EPA. This dataset is no longer maintained.

Agency Version Date: 09/23/2019	Agency: Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: (202) 566-1667
Planned Next Contact: 01/04/2023	Most Recent Contact: 10/10/2022

RADINFO: EPA regulated facilities with radiation and radioactive materials

Agency Version Date: 08/01/2019	Agency: Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: (202) 566-1667
Planned Next Contact: 12/22/2022	Most Recent Contact: 09/26/2022

RMP: Facilities producing/handling/ process/ distribute/ store specific chemicals report plans required by the Clean Air Act

Agency Version Date: 04/01/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Monthly	Agency Contact: (202) 564-2534
Planned Next Contact: 12/21/2022	Most Recent Contact: 09/23/2022

ROD: Permanent remedy at an NPL site

Agency Version Date: 07/22/2022	Agency: Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: (800) 424-9346
Planned Next Contact: 10/18/2022	Most Recent Contact: 07/22/2022

OTHER ASCERTAINABLE RECORDS (cont.)

SCHOOLS PRIVATE: List of Private Schools

Agency Version Date: 10/07/2022
 Agency Update Frequency: Varies
 Planned Next Contact: 01/05/2023

Agency: DHS Homeland Infrastructure Foundation
 Agency Contact: N/R
 Most Recent Contact: 10/07/2022

SCHOOLS PUBLIC: List of Public Schools

Agency Version Date: 10/07/2022
 Agency Update Frequency: Varies
 Planned Next Contact: 01/05/2023

Agency: DHS Homeland Infrastructure Foundation
 Agency Contact: N/R
 Most Recent Contact: 10/07/2022

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners

Agency Version Date: 08/23/2022
 Agency Update Frequency: No Update
 Planned Next Contact: 11/18/2022

Agency: Environmental Protection Agency
 Agency Contact: (202) 566-1667
 Most Recent Contact: 08/23/2022

SEMS_SMELTER: This report includes sites that have smelting-related, or potentially smelting-related, indicators in the SEMS database. The report includes information on the site location as well as contaminants of concern.

Agency Version Date: 07/22/2022
 Agency Update Frequency: Quarterly
 Planned Next Contact: 10/18/2022

Agency: U.S. Environmental Protection Agency
 Agency Contact: 703-603-8867
 Most Recent Contact: 07/22/2022

SSTS: Tracking of facilities who produce pesticides and their quantity

HYDROLOGIC UNIT

Hydrologic Unit Maps

USGS

The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

Please circle your responses:

	If "Yes" Go To	If "No" Go To
1. Is a public water supply well located within 2000 feet of the leak or discharge site, or is the site located within wellhead protection zones 1 or 2 of a public water supply well?	12	2
2. Is the leak or discharge site located in or over a sand and gravel deposit?	2A	3
2A. Is the entire area, within a 2000 foot radius of the leak or discharge site, a non-attainment zone?	2B	12
2B. Is there potential for vapor problems within buildings or for a confined space fire or explosion hazard?	13	11A
3. Was the release directly into bedrock or is the bedrock groundwater system contaminated?	9	4
4. Was the release directly into a glacial till deposit?	9	5
5. Was the release into a silt or clay deposit?	6	N/A
6. Is there at least 10 feet of silt and/or clay between the contaminated zone and underlying more permeable surficial deposits (such as glacial till or sand and gravel) or bedrock?	7	9
7. Are the area's gradients approximately horizontal (topographic gradient flat or groundwater gradient <1%)?	8	9
8. Does the seasonal low of the water table fall below the top of the underlying aquifer (sand and gravel deposit or bedrock)? If unknown, the answer is yes.	9	10
9. Is the area within 2000 feet downgradient or 1000 feet upgradient served by a public water supply?	10	12
10. Is there potential for vapor problems within buildings or for a confined space explosion hazard?	13	11
11. Is the entire area, within a 2000 foot radius of the leak or discharge site, a non-attainment zone?	11A	13
11A. Is the site now or in the past been in a predominantly industrial land use?	14A	14B

Check clean-up goal decided upon:

- 12. **Stringent (ST) Clean-Up Goals** Remove all free product. Remove or remediate contaminated soil containing greater than 10 ppm total fuel oil or kerosene, or 5 ppm total gasoline as determined by DEP-approved laboratory methods. Remediate groundwater containing greater than 50 ug/l total hydrocarbons (gasoline, kerosene, or fuel oil by DEP approved laboratory analytical methods or field techniques), 50 ug/l MTBE, and 5 ug/l benzene by DEP or EPA approved methods.
- 13. **Intermediate (IN) Clean-Up Goals** Remove all free product. Remove or remediate contaminated soil containing greater than 10 mg/kg total fuel oil or kerosene, or 5 mg/kg total gasoline as determined by DEP-approved laboratory methods or equivalent DEP-approved field techniques.
- 14A. **Baseline-1 (BL1) Goals** Remove all free product. Remove or remediate soil saturated with gasoline, kerosene, or fuel oil.
- 14B. **Baseline-2 (BL2) Goals** Remove all free product. Remove or remediate contaminated soil to: 500-1,000 ppm gasoline or 200-400 ppm heating oil or kerosene, each as measured by the DEP field headspace analysis or its Department approved equivalent field method.
- Other (Specify): _____ Complete justification below.

Note: Where there is significant uncertainty regarding the identity of the product, the lower oil standards shall apply; and, in the stringent category, groundwater shall be analyzed for MTBE and benzene.

JUSTIFICATION OF ALTERNATE CLEAN-UP GOAL:

NOTE: This form must be included in the case's Spill Report if completed by Division of Response Services staff. Other Bureau staff must include this documentation in the project file.

State House Station 17
Augusta, Maine 04333-0017

RE: Contamination Assessment and UST Removal Report
Spillane Car Rental, South Portland, Maine
FSI Project No. 296.01

Dear Mr. Bispham:

I am writing in regard to our recent conversations with you and Fred Lavallee on volatile organic compound (VOC) data for the above mentioned site assessment. We have analyzed the photo-ionization detector (PID) data obtained, and are able to report corrected PID readings for the site.

As discussed, the error arose in late 1996, when DEP implemented certain changes in calibration settings for PIDs in field use at that time. These settings eliminated the "benzene equivalent" setting recommended by the instrument's manufacturers, and allowed direct reading of the VOC concentrations.

Field Services personnel used the new settings as directed, but retained the benzene equivalent factor. For the PID used in this assessment, a Thermo Environmental Model 580 B, this method gives 51% of the direct reading value.

To correct this situation, the assessed results may be multiplied by 1.96 (1.00/0.51). As a check on the methodology, the reported calibration response value of 164 parts per million (ppm) VOC becomes 322 ppm VOC, which is within 1% of the anticipated direct reading value of 320 ppm.

Using this method, we have generated a corrected Field Jar/Polybag Headspace Analysis table, and are enclosing it for inclusion in the report. Please feel free to call if you have any questions or comments on the corrected table.

Yours truly,

John R. Gordon, Scientist
Field Services, inc.

P/453/87

NATIONAL CAR RENTAL --- SOUTH PORTLAND

04/09/87: The Portland Pump co. tested two underground tanks syphoned together which stored unleaded gasoline at the National Car Rental building, 60 Darling Ave., S.Portland, ME (773-0286). The test was done as a result of gasoline found on the groundwater near the tanks. The soil had been excavated for a building addition.

The test results proved the tank to be tight with a system loss of 0.015 gallons per hours. The gasoline contamination which was observed was apparently due to spillage while filling cars.

No other action is necessary.

MARK ST. GERMAIN

IV. NARRATIVE

While excavating for the water/sewer hook up (addition to childcare facility) the Les Wilson crew encountered gasoline contaminated soils. A file search revealed in 1987, Maine DEP's Mark St. Germaine responded to a UST (Underground Storage Tank) removal at the property. The tanks were tested by Portland Pump, see attached spill report (P-453-1987) and found to be competent. Contamination was attributed to surface spills while filling fleet vehicles. Ralph Gilman has been the property owner throughout any DEP involvement.

This current contamination is being removed to the extent of the area needed for the piping to be installed (water/sewer). Given that the present facility is a slab construction and the new building also slab, and the area served by public water & sewer, no further removal or Response actions are planned.

1987 report narrative

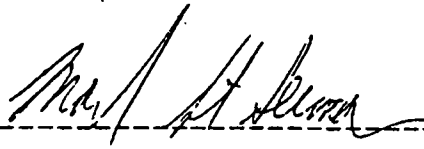

P/453/87

NATIONAL CAR RENTAL --- SOUTH PORTLAND

04/09/87: The Portland Pump co. tested two underground tanks syphoned together which stored unleaded gasoline at the National Car Rental building, 60 Darling Ave., S.Portland, ME (773-0286). The test was done as a result of gasoline found on the groundwater near the tanks. The soil had been excavated for a building addition.

The test results proved the tank to be tight with a system loss of 0.015 gallons per hours. The gasoline contamination which was observed was apparently due to spillage while filling cars.

No other action is necessary.

IV. NARRATIVE

Central Maine Power Company (CMP) reported that a contractor had hit one of their pad mounted transformers (see attached CMP Spill Report). The hit caused the transformer to leak 20 gallons of oil onto the ground and into the pit underneath it. The transformer was tagged non-polychlorinated biphenyls (non-PCBs). The transformer pit has water in it, which had to be pumped out with the oil. The oil that spilled onto the ground was cleaned up with sorbent material. No further Division of Response Services action needed at this time.

Re: National Car Rental System, Inc.
60 Darling Avenue, South Portland, Maine
Registration No. 145

Dear Sir/Madam:

The facility referenced above, formerly operated by Spillane Car Rental Company, has changed operators as of May 8, 1992. The facility currently has one (1) 3,000 gallon UST and one (1) 2,000 gallon UST, both containing unleaded gasoline. In addition, there is also (1) 500 gallon UST containing fuel oil and (1) one 500 gallon UST containing waste oil. Please change your records to reflect the following information:

OWNER: Spillane Car Rental Company
60 Darling Avenue
South Portland, ME

RE: National Car Rental
60 Darling Ave.
South Portland, ME 04106

Dear Ms. Allen:

Regarding your letter of May 26 concerning Spillage^N Car Rental Co.
registration No. 145. The Maine Department of Environmental Protection has not
received a copy of a site assessment as required by Law. I have enclosed information
about tank removal, page two paragraph D and the requirements for a site assessment.

Thank you for your interest in closing this file. You may call me at 207-287-
2651 if you have any further questions.

Sincerely,

William V. Valentine

ATTENTION: TANK REGISTRATION SECTION

Re: National Car Rental System, Inc.
60 Darling Avenue, South Portland, Maine
Registration No. 145

Dear Sir/Madam:

Please be aware the owner of the above referenced facility, Spillane Car Rental Company, removed one (1) 3,000 gallon UST and one (1) 2,000 gallon UST in late 1992. Both previously contain unleaded gasoline. Spillane Car Rental Company is, to the best of National's knowledge, proceeding with the appropriate action as directed by the State of Maine. Please correct your records to reflect these changes.

National Car Rental is the current operator of this facility.

Should you have any additional questions or need additional information regarding this matter, please contact me directly at 612/8930-6247. Thank you.

Sincerely,

NATIONAL CAR RENTAL SYSTEM, INC.

**DEPARTMENT OF ENVIRONMENTAL PROTECTION
REGISTRATION FORM FOR UNDERGROUND OIL
AND HAZARDOUS SUBSTANCES (CHEMICAL)
STORAGE TANKS
(Pursuant to 38 M.R.S.A. Section 563, 40 CFR Part 280)**

Facility Name: Spillane Car Rental Co.
 Location (Town/City): So. Portland, Maine
 Owner: Ralph R. Gilman

REGISTRATION NUMBER (Complete ONLY if Registration Number has been previously assigned.)

4. TANK OWNER
 A. Name: Ralph R. Gilman
 B. Mail Address: Chute Road
 C. Town/City: So. Windham D. State: Maine
 E. Zip Code: 04082 F. Telephone: (207) 892-9508
5. TANK OPERATOR
 A. Name: Spillane Car Rental Company
 B. Mail Address: 60 Darling Avenue
 C. Street Address: 60 Darling Avenue
 D. Town/City: So. Portland E. State: Maine
 F. Zip Code: 04106 G. Telephone: (207) 773-0286

6. COMPLETE the next two pages of this form and include each tank currently at the facility and each new or replacement tank planned for the facility.

7. ENCLOSE a check for the applicable registration fee with this submittal made payable to "Treasurer — State of Maine" and return to the Department of Environmental Protection. Registration fees are applicable ONLY to active, new, or replacement tanks used for the marketing and distribution of oil. Registration fees are due upon registration and annually thereafter, prior to the first day of January. Fees are as follows:

_____ Tanks 6,000 gallons or under in size _____ \$25 per tank
 _____ Tanks over 6,000 gallons in size _____ \$50 per tank

8. MAKE TWO COPIES of this form. SUBMIT the original to the DEPARTMENT OF ENVIRONMENTAL PROTECTION (Bureau of Oil & Hazardous Materials Control, State House Station 17, Augusta, Maine 04333). SEND one copy to the LOCAL FIRE DEPARTMENT having jurisdiction. RETAIN the third copy for your records. For new and replacement tanks, registrations are due at least five (5) business days prior to installation. Registrations for existing tanks are due prior to February 1, 1986.

9. CERTIFY THIS FORM BY SIGNING. By signing this form, the tank registrant certifies that all information is accurate and complete, and that they will comply with all applicable federal, state and local laws and regulations concerning the underground storage of petroleum or other hazardous materials. The owner or operator is required by Maine statute to file an amendment to this registration with the Department of Environmental Protection immediately upon any change in the information on this form.

Ralph R. Gilman
Spillane Car Rental Co.
60 Darling Avenue
South Portland, Maine 04106

Dear Mr. Gilman:

Thank you for submitting registration forms for existing underground storage tanks located at Spillane Car Rental, South Portland. These materials were received on January 7, 1986.

At the present time, a heavy workload and shortage of staff make it impossible for the Department to review these materials in detail or to assign a registration number. We will be accomplishing these tasks within the next few months as our resources permit. Once the review is completed, we will notify you as to the registration number of your facility and may ask a few questions if we do not understand material on the form.

In the meantime, please retain this letter as evidence that you have submitted registration materials for your facility.

Sincerely,

Division of Remedial Planning & Technical Services
Bureau of Oil and Hazardous Materials Control

Registration No. 145

Dear Sir/Madam:

The facility referenced above, formerly operated by Spillane Car Rental Company, has changed operators as of May 8, 1992. The facility currently has one (1) 3,000 gallon UST and one (1) 2,000 gallon UST, both containing unleaded gasoline. In addition, there is also (1) 500 gallon UST containing fuel oil and (1) one 500 gallon UST containing waste oil. Please change your records to reflect the following information:

OWNER: Spillane Car Rental Company

Re: National Car Rental System, Inc.
60 Darling Avenue, South Portland
Facility Registration Number: 145

Dear Sir/Madam:

In early June 1995 NCR Acquisition Corp. acquired the assets of National Car Rental System, Inc. Immediately following this transaction, NCR Acquisition Corp. changed its name to National Car Rental System, Inc. such that there was no corporate name changes as the result of the sale transaction.

However, based upon our interpretation of the underground storage tank regulations it is necessary that National Car Rental System, Inc., the current operator at the above referenced location, provide this information to the Maine DEP. The facility is still owned by Spillane Car Rental Company.

If you require any additional information or have any further questions regarding the change in corporate ownership, please contact me directly at 612/893-6569 or by facsimile at 612/893-6430. Thank you.

Sincerely,

NATIONAL CAR RENTAL SYSTEM, INC.

RE: UNDERGROUND STORAGE TANK NOTIFICATION

Dear Madam or Sir:

National Car Rental System, Inc. has submitted a Notification for Underground Storage Tanks to your agency. Accordingly, I am writing to notify you of the pending sale of National Car Rental System, Inc. On or about June 1, 1995, NCR Acquisition Corp. will acquire the assets of National Car Rental System, Inc. Immediately after the transaction, NCR Acquisition Corp. will change its name to National Car Rental System, Inc., such that there will be no name change as a result of the transaction.

As part of this transaction, the new National Car Rental System, Inc. will begin operating the facilities at which the underground storage tanks subject to notification are located. The transaction will not affect the day-to-day operations at those facilities or the use of the tanks. I will continue to coordinate environmental matters as a representative of the new National Car Rental System, Inc.

The new National Car Rental System, Inc. anticipates that it will comply with the underground storage tank financial responsibility requirements through a surety bond, which is the same mechanism currently in place for National Car Rental System, Inc. We will advise you of any change in these plans.

For your information, I have enclosed copies of the Notifications that have been submitted to your agency. If you require any additional information, please call me at (612) 893-6280 or contact me by facsimile at (612) 893-6430.

Sincerely,

RE: UST Site Assessment Report/ October 19, 1992
Facility Registration No.(s) 145 /Number of Tank(s) 1 & 2
Location of Assessment: Spillane Car Rental Co., South Portland, Maine

Dear Mr. Gilman:

This letter is to acknowledge receipt of a site assessment report conducted at the time of the closure of the above referenced underground oil storage tank(s) (UST). With the exception of being submitted late, the site assessment and the site assessment report satisfactorily meet the requirements of Maine's underground oil storage tank regulations (Chapter 691, Section 11 and Appendix P).

With receipt of a satisfactory site assessment report and abandonment notice, your UST registration records are amended to show the above tank(s) as abandoned. If the site assessment found oil contamination, the required second copy that you submitted has been forwarded to field personnel in the closest Department regional office for possible follow up if clean up is needed or additional remediation measures must be undertaken beyond those taken previously. In no way should the meaning of this letter be interpreted to also include approval of any recommendations or conclusions contained in this report regarding the need for or the levels of clean-up. Such approvals and decisions should be obtained directly from the Department field staff working on the clean-up of your site.

Please be sure that if contamination was found that it was properly reported to the Department and that a copy of the site assessment report was provided to the chief municipal official in the town in which the tanks were located.

Questions may be directed to the Bureau of Remediation & Waste Management at (207) 287-2651.

Sincerely,

George Seel, Director

1.0 PURPOSE OF ASSESSMENT

During April 1997, Field Services was retained by Erskine Construction (Erskine) to conduct a limited assessment of site conditions in the vicinity of one underground storage tank (UST) at the Spillane Car Rental facility on Darling Avenue in South Portland, Maine, and, subsequently, to observe its removal. A site location map is provided as Figure 1. The intent of this assessment is to evaluate whether the UST facility has discharged its contents into the environment.

To accomplish this objective, a limited field investigation was performed. The field investigation consisted of observing the removal of the UST and an adjacent UST, evaluating soil conditions encountered in the tank excavation, and collecting soil samples from the UST excavation for visual, olfactory and instrumental analysis.

Additional tasks included a limited review of site history, a review of town and state agency files, and a review of the environmental setting of the property. This assessment did not include an evaluation of abutting properties or of asbestos-containing materials in on-site structures or on-site property.

This assessment has been undertaken according to the provisions set forth in Chapter 691 of Maine DEP regulations regarding the closure of underground storage facilities by removal. The content and format of this assessment is based on the requirements specified in Appendix P of Chapter 691.

2.0 SITE LOCATION AND DESCRIPTION

The Spillane Car Rental property (Spillane) is located on the east side of Darling Avenue, approximately 0.1 miles southeast of the junction of that street with Maine Mall Road in the City of South Portland, Maine. The property is shown on the South Portland municipal tax map as Map 48, Lot 12A. The site consists of an approximately 0.92 acre parcel, bounded to the north and to the south by business properties. A narrow strip of undeveloped wetland abuts the property to the northeast. Other business properties lie across Darling Avenue to the west.

As shown on the site sketch (Figure 2), the assessed tank facility lies next to the building, on the northeastern corner of the property. The facility consisted of two USTs, of which only UST T-4, a waste oil tank, required assessment. UST T-3, a fuel tank containing no. 2 fuel oil, was connected to a heating unit inside the building. Paved surfaces surrounded both tanks.

Drinking water in the area surrounding the property is provided by the Portland Water District from a remote surface source. No public water supplies are known to be located within 2,000

feet, and no private drinking water supplies are known to be located within 300 feet of the facility. According to the Maine Geological Survey's Significant Sand and Gravel Aquifers map, the site is not located on a sand and gravel aquifer.

Topography immediately surrounding the site is flat. The exact geographic coordinates of the site are 43° 38' 31.36" north latitude by 70° 17' 37.89" west longitude.

A review of UST registration number 145 at the Southern Maine Regional Office of DEP in Portland, Maine on May 1, 1997 indicated that underground storage tanks at National's facility are registered to the Spillane Car Rental Company, d/b/a National Car Rental.

Two single-wall steel tanks, reportedly containing 3,000 gallons (T-1) and 2,000 gallons (T-2) of gasoline, were shown as having been removed from the site. These tanks were reportedly installed in 1973, and were used for commercial fuel storage and retail distribution.

The other tanks consisted of two 500 gallon single-wall steel underground storage tanks, shown as installed in 1982, and containing no. 2 fuel oil (T-3) and waste oil (T-4). During work on the site, UST T-3 was found to have a capacity of 1,000 gallons. These tanks are listed as planned for removal. The facility was shown as having been used for storage of heating oil and waste oil. It was also shown as located in a non-sensitive geologic area.

Soils observed in the immediate vicinity of the tanks during the removal consisted of a brown, heavy, dense medium sand from the ground surface to an average depth of approximately three feet below ground surface (BGS). The sand was slightly damp at three feet BGS.

Between three and five feet BGS, soils consisted of blue-olive silt and silty clay, becoming a hard, dense olive clay at five and one half feet BGS. From that depth to the bottom of the excavation at approximately six and one half feet BGS, the soil was composed of olive clay. Soils were not observed below the bottom of the excavation at six and one half feet BGS.

Bedrock was not encountered in the excavation, but groundwater, probably perched on the clay layer, was observed within the excavation at a depth of about four feet BGS.

3.0 SITE HISTORY

The property is presently owned by Spillane Car Rental Company, who reportedly installed all four tanks on the property. According to National personnel, tank T-3 was used for storage of no. 2 heating fuel oil, and the assessed tank, T-4, was used for storage of waste oil.

The area surrounding the site has been used as a business complex since it was developed in the mid- to late 1960s.

Seacoast Ocean Services (Seacoast) provided a site assessment describing the removal of two gasoline tanks at the Spillane site in October 1992. The assessment documented the removal of the two on-site USTs containing gasoline, T-1 and T-2.

Alan Lycars of Seacoast documented the removal of the two tanks, and reported finding volatile organic compounds (VOCs) in excess of 100 parts per million (ppm), using the polyethylene bag headspace method described in Appendix Q of Chapter 691.

The assessment indicates that Mr. Lycars notified Steven Flannery of Maine DEP's Response Services Division, who assigned Maine DEP spill number P-665-92 to the site. Mr. Flannery reportedly inspected the site and recommended removal of at least some of the contaminated soil present. No further action was taken, reportedly pending resolution of a dispute over responsibility for the remediation costs between National and the property owner.

4.0 REVIEW OF REGULATORY AGENCY FILES

A review of files at the City of South Portland Code Enforcement office on May 15, 1997 revealed that property has been used for commercial purposes since at least 1970, the date of the earliest document found.

The Code Enforcement records contained documents relating to the installation of two gasoline USTs at the Spillane site by Portland Pump Company in 1972, and a removal notice for those tanks, filed on November 5, 1992. No information concerning the installation of the subject tanks was found in the municipal files.

A notice of the facility's connection in 1980 to the municipal sewer system was found. Written permits, authorizing the Bayview Sales Corporation to operate a used car facility on the Spillane property, were noted from 1973 to 1996.

In conversation with Field Services personnel, Assistant Fire Chief Miles Haskell of the South Portland Fire Department stated that he could recall no specific instances of spills or responses at the Spillane facility over the past ten years. Chief Haskell indicated that the Department does not maintain specific written records of discharges of oil or hazardous materials at facilities within the City. Department records are reportedly limited to DEP tank installation and removal notices submitted to them by property owners and contractors.

On May 1, 1997, Field Services personnel conducted a review of available spill files maintained

by the Bureau of Remediation and Waste Management of the Maine Department of Environmental Protection. Three references were found relating directly to the site.

The first reference was to DEP spill number P-533-91, which was issued on September 13, 1991 by John Gordon, a responding OHMS I with the Southern Maine Regional Response Office. The spill report described a discharge of an unknown brown, oily material on the side of the road adjacent to the Coca-Cola bottling plant, a business located across Darling Avenue from the site.

The discharge was reported anonymously at 0847 hours, and was investigated later that morning by Mr. Gordon. No evidence of a discharge was found at the reported site, and the case was closed pending further information.

Several days later, during a conversation with South Portland Fire Department personnel, Mr. Gordon learned that the discharge was behind the Coca-Cola bottling plant building, and consisted of waste soft drink syrup deliberately discarded by plant personnel.

The second reference was to DEP spill number P-665-92, which was issued to the site on October 19, 1992 by Steven Flannery, a responding OHMS with the Southern Maine Regional Response Office.

The spill report was not found in the files at the time of this search. Data gathered from the office spill report log for 1992 suggested that spill number P-665-92 was likely a response to a gasoline discharge, associated with the tank removals documented in the above-described assessment. No additional information was available.

The final reference was to DEP spill number P-205-97, which was issued to the site on April 22, 1997 by Sheryl Bernard, a responding OHMS II with the Southern Maine Regional Response Office. The spill report file reportedly will document this tank removal.

5.0 FIELD INVESTIGATION - UST EXCAVATION AND REMOVAL

5.1 FIELD OBSERVATIONS

On April 22, 1997, two single-wall steel USTs were excavated and removed from the ground at the Spillane Car Rental facility. UST T-3 contained no. 2 fuel oil, with a reported capacity of 500 gallons; however, the observed capacity was probably 1,000 gallons. UST T-4, the assessed tank, contained waste oil, also with a reported capacity of 500 gallons. As previously indicated, the tanks were located in a paved area near the north side of the building.

Tank removal activities were performed to meet the following objectives:

- assess the integrity of the USTs being removed;
- evaluate subsurface geologic and hydrogeologic conditions in the vicinity of the tank excavation area;
- evaluate evidence of possible petroleum releases such as sheens, odors, volatile organic compound vapors in soil or the release of free product in the tank excavation;
- assess the nature and extent of impacts from possible releases; and
- recommend future measures, if warranted.

Tank excavation and removal were performed by Erskine. Field Services personnel were present to observe field activities.

Prior to the beginning of excavation activities, the tanks were gauged by Erskine personnel, who found a trace of oil and water in UST T-3. Less than 10 gallons of waste oil were present in UST T-4.

The tanks were then excavated and removed from the ground, along with their attached piping. After removal, each tank was subjected to a visual survey to evaluate its physical condition.

Tank T-3, which was a single-wall steel UST, exhibited substantial surface corrosion across the body of the tank. Numerous deep corrosion pits were noted across the tank's surface, and a pin-hole perforation was observed in a seam weld on the end of the tank. The tank was observed to be in poor condition. The tank suffered minor construction damage during its removal.

Tank T-4, which was also a single-wall steel UST, exhibited limited surface corrosion across the body of the tank. A few shallow corrosion pits were observed, primarily on the western end of the tank. Otherwise, the tank was observed to be in good condition, with no evidence of holes, cracks or perforations observed on the exterior surface.

The piping attaching the tanks to the remote fills and vents consisted of both galvanized and cast iron pipe, with cast iron fittings. The piping was in good condition, with slight surface corrosion and no leaking fittings noted. All piping and fittings were removed from the ground.

Although a strong petroleum odor was noted during the removal of tank T-3, staining was observed only on soil in contact with the asphalt-coated surfaces of that tank. No staining was noted around tank T-4 or its fittings, and no sheen was observed on groundwater within the excavation.

Following removal of the tanks and piping, additional soil samples were taken from soil underlying the tanks. No VOC readings in excess of 100 ppm were obtained, but visible and olfactory evidence of a discharge was obtained, and the Southern Maine Regional Office of Maine DEP was so notified at 1004 hours. Maine DEP spill number P-205-97 was assigned to the site by Sheryl Bernard of that office.

5.2 SOIL REMOVAL AND DISPOSITION

Soils around and beneath the two tanks were analyzed by the field polybag headspace analytical method, using a Thermo Environmental Model 580B Photoionization Detector (PID). These soils were a mixture of dense sand, silt and silty clay, and were found to show very low VOC concentrations.

Field headspace samples of the stained soil observed in proximity to the fuel oil tank (T-3) showed readings of less than 10 ppm. Soils around and beneath the waste oil tank (T-4) were inspected for visual or olfactory evidence of a spill. No such evidence was observed.

Following the instructions of Sheryl Bernard of DEP, no soil removal was undertaken and the excavations were closed. The excavations were then backfilled to grade with sand supplied by Erskine.

Field data records, including observations of the UST removal and quality controls for the field measurements, are provided in Appendix A. A copy of the relevant Maine DEP Decision Tree for this site is presented as Appendix B.

6.0 FIELD HEADSPACE SOIL SCREENING

After the tanks were removed from the ground, an assessment of petroleum-related impacts to the soil in the tank excavation area was performed.

This assessment consisted of visual and olfactory screening of selected soil samples, and field headspace screening for the presence of VOC vapors, using PID. Soil samples were collected from the tank excavations, and from areas proximal to the vent, fill and supply pipes.

Samples were collected from these locations with the bucket of the excavator and subjected to visual and olfactory screening, and field screening analysis as appropriate, using the polyethylene bag headspace method described in Appendix Q of Chapter 691.

Results of field polyethylene bag headspace screening of soils collected from the excavation gave results ranging from a low of 0.0 ppm (several samples) to a high of 6.7 ppm (sample S-3).

The property appears to meet the requirements of a Baseline-1 Clean-Up Goal (**BL1**), as set forth in the Maine DEP Hydrocarbon Spill Decision Tree (Appendix B). This goal mandates removal or remediation of contaminated soils saturated with gasoline, kerosene or fuel oil, as determined by a DEP-approved field headspace method.

7.0 SUBSURFACE CONDITIONS

Soil in the immediate vicinity of the two tanks consisted of a brown, heavy, dense medium borrow sand. The native material was a blue-olive silt and silty clay, that became a hard, dense olive clay at depths greater than five and one half feet BGS.

Bedrock was not encountered in the excavation, but groundwater, probably perched on the clay layer, was observed within the excavation at a depth of about four feet BGS.

Soils were not observed below the bottom of the excavation at six and one half feet BGS.

8.0 SUMMARY OF FINDINGS

During April 1997, Field Services observed the removal of two underground storage tanks at the Spillane Car Rental facility on Darling Avenue in South Portland, Maine. The principal objectives of the assessment were to evaluate subsurface conditions in the vicinity of the former USTs, to assess the integrity of the tanks, and to evaluate soil quality. To accomplish these objectives, the activities described in this report were performed and included:

- a limited review of site history;
- a review of local and state agency files for information regarding past incidents relating to the storage, handling, and release of hazardous materials at the site;
- evaluation of subsurface soil conditions;
- evaluation of evidence of possible petroleum releases such as sheens, odors, volatile organic compound vapors in soil or the presence of product in the tank excavation; and,
- collection and analysis of soil samples from the excavation.

To qualitatively assess potential petroleum impacts to subsurface soils on the site, visual, olfactory and field bag headspace screening of selected soil samples obtained from the excavation

surrounding the tanks and piping was performed. A Baseline-1 (BL1) Clean-Up Goal was established for the site.

Two underground storage tanks, the first containing no. 2 fuel oil and the second containing waste oil, were removed from the ground during April 1997. Following removal of the tanks, a visual survey was performed to evaluate their condition.

UST T-3 was observed to be in poor condition, with one hole observed in the exterior surface of the tank. Visual evidence of spillage was noted around the UST. Some damage was done to this tank during construction activity. UST T-4 was observed to be in good condition, with no evidence of cracks, holes or perforations observed in the exterior surface of the tank.

Vent, dispenser and fill piping associated with these tanks was observed to be in good condition. No loose, damaged or leaking fittings were observed in the piping system.

Based on the data collected during this assessment, there appears to have been a heating oil impact to the environment at the Spillane facility, as described in the Chapter 691 regulations of the Maine Department of Environmental Protection.

While off-site downgradient conditions were not evaluated as part of this assessment, the contamination observed during the tank removals does not appear to be significant. Given the uses and location of the site, and the lack of significant potential receptors in the area, no additional investigation is recommended.

9.0 LIMITATIONS

This assessment was performed according to generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area. Field Services observed a degree of care and skill generally exercised by other consultants under similar circumstances and conditions. Field Services' findings and conclusions must be considered not as scientific certainties but rather as professional opinion concerning the significance of the limited data gathered during the course of this investigation. Specifically, Field Services does not and cannot represent that the site contains no hazardous material, oil, or other latent conditions beyond the immediate location of the site assessment. No other warranty, expressed or implied, is made.

Investigator: Sheryl Bernard

Date: 4 22 97

Site Name, Address: Spillane Car Rental
60 Darling Ave

Town: South Portland

Please circle your responses:

	If "Yes" Go To	If "No" Go To
1. Is a public water supply well located within 2000 feet of the leak or discharge site, or is the site located within wellhead protection zones 1 or 2 of a public water supply well?	12	<u>2</u>
2. Is the leak or discharge site located in or over a sand and gravel deposit?	2A	<u>3</u>
2A. Is the entire area, within a 2000 foot radius of the leak or discharge site, a non-attainment zone?	2B	12
2B. Is there potential for vapor problems within buildings or for a confined space fire or explosion hazard?	13	11A
3. Was the release directly into bedrock or is the bedrock groundwater system contaminated?	9	<u>4</u>
4. Was the release directly into a glacial till deposit?	9	<u>5</u>
5. Was the release into a silt or clay deposit?	<u>6</u>	N/A
6. Is there at least 10 feet of silt and/or clay between the contaminated zone and underlying more permeable surficial deposits (such as glacial till or sand and gravel) or bedrock?	7	<u>9</u>
7. Are the area's gradients approximately horizontal (topographic gradient flat or groundwater gradient <1%)?	8	9
8. Does the seasonal low of the water table fall below the top of the underlying aquifer (sand and gravel deposit or bedrock)? If unknown, the answer is yes.	9	10
9. Is the area within 2000 feet downgradient or 1000 feet upgradient served by a public water supply?	<u>10</u>	12
10. Is there potential for vapor problems within buildings or for a confined space explosion hazard?	13	<u>11</u>
11. Is the entire area, within a 2000 foot radius of the leak or discharge site, a non-attainment zone?	<u>11A</u>	13
11A. Is the site now or in the past been in a predominantly industrial land use?	<u>14A</u>	14B

Check clean-up goal decided upon:

- 12. **Stringent (ST) Clean-Up Goals** Remove all free product. Remove or remediate contaminated soil containing greater than 10 ppm total fuel oil or kerosene, or 5 ppm total gasoline as determined by DEP-approved laboratory methods. Remediate groundwater containing greater than 50 ug/l total hydrocarbons (gasoline, kerosene, or fuel oil by DEP approved laboratory analytical methods or field techniques), 50 ug/l MTBE, and 5 ug/l benzene by DEP or EPA approved methods.
- 13. **Intermediate (IN) Clean-Up Goals** Remove all free product. Remove or remediate contaminated soil containing greater than 10 mg/kg total fuel oil or kerosene, or 5 mg/kg total gasoline as determined by DEP-approved laboratory methods or equivalent DEP-approved field techniques.
- 14A. **Baseline-1 (BL1) Goals** Remove all free product. Remove or remediate soil saturated with gasoline, kerosene, or fuel oil.
- 14B. **Baseline-2 (BL2) Goals** Remove all free product. Remove or remediate contaminated soil to: 500-1,000 ppm gasoline or 200-400 ppm heating oil or kerosene, each as measured by the DEP field headspace analysis or its Department approved equivalent field method.
- Other (Specify): _____ Complete justification below.

Note: Where there is significant uncertainty regarding the identity of the product, the lower oil standards shall apply; and, in the stringent category, groundwater shall be analyzed for MTBE and benzene.

JUSTIFICATION OF ALTERNATE CLEAN-UP GOAL:

NOTE: This form must be included in the case's Spill Report if completed by Division of Response Services staff. Other Bureau staff must include this documentation in the project file.

Mr. Harrison A. Bispham
Technical Services Division, Maine Department of Environmental Protection
State House Station 17
Augusta, Maine 04333-0017

RE: Contamination Assessment and UST Removal Report
Spillane Car Rental, South Portland, Maine
FSI Project No. 296.01

Dear Mr. Bispham:

I am writing in regard to our recent conversations with you and Fred Lavalley on volatile organic compound (VOC) data for the above mentioned site assessment. We have analyzed the photo-ionization detector (PID) data obtained, and are able to report corrected PID readings for the site.

As discussed, the error arose in late 1996, when DEP implemented certain changes in calibration settings for PIDs in field use at that time. These settings eliminated the "benzene equivalent" setting recommended by the instrument's manufacturers, and allowed direct reading of the VOC concentrations.

Field Services personnel used the new settings as directed, but retained the benzene equivalent factor. For the PID used in this assessment, a Thermo Environmental Model 580 B, this method gives 51% of the direct reading value.

To correct this situation, the assessed results may be multiplied by 1.96 (1.00/0.51). As a check on the methodology, the reported calibration response value of 164 parts per million (ppm) VOC becomes 322 ppm VOC, which is within 1% of the anticipated direct reading value of 320 ppm.

Using this method, we have generated a corrected Field Jar/Polybag Headspace Analysis table, and are enclosing it for inclusion in the report. Please feel free to call if you have any questions or comments on the corrected table.

Yours truly,

John R. Gordon, Scientist

Facility Location: 60 Darling Ave.

1. Identify the tanks at this location which are to be removed:

	<u>Tank Number</u>	<u>Age of Tank (Years)</u>	<u>Tank Size (Gallons)</u>	<u>Type of Product Most Recently Stored</u>
A.	<u>1</u>	<u>19</u>	<u>3,000</u>	<u>Gasoline</u>
B.	<u>2</u>	<u>19</u>	<u>2,000</u>	<u>"</u>
C.				
D.				

2. Directions to Facility (be specific):

3. Is tank(s) used for the storage of Class I liquids (e.g. gasoline, jet fuel)? Yes No (IF YES, REMOVAL OF THE TANK MUST BE UNDER THE DIRECTION OF A CERTIFIED TANK INSTALLER ~~OR PROFESSIONAL FIREFIGHTER~~)

4. Name and telephone number of contractor who will do the tank removal: Portland Pump Co. 1-800-640-7867

Certified Tank Installer Certification Number & Name (if applicable):

David W. Crox Ford 092

~~Professional Firefighter~~ Yes No (Affiliation: _____)

5. Expected date of removal: 11/5/92

I hereby provide Notice that I intend to properly abandon the underground oil storage facility as described above.

Date: 10/5/92 Portland Pump Co. (Agent for owner)
Signature of Tank Owner or Operator

David W. Crox Ford G.M.
Printed Name and Title

THIS FORM MUST BE FILED WITH THE DEPARTMENT AND LOCAL FIRE DEPARTMENT 30 DAYS PRIOR TO REMOVAL - RETURN POSTCARD WHEN TANK(S) HAS BEEN REMOVED.

Mail original and yellow copy to DEP; pink copy to fire dept.; retain gold copy

RE: Contamination Assessment and UST Removal Report

Dear Mr. Gilman,

I am pleased to provide the enclosed report for the site assessment conducted at the Spillane Car Rental Company in South Portland, Maine. It was prepared to comply with Maine Department of Environmental Protection underground storage tank (UST) regulations.

This report describes UST removal activities which took place in October 1992. At your request I have prepared this report from personal field notes written during the time of tank removal. I appreciate the opportunity to reconstruct this assessment report for you.

Sincerely,

A handwritten signature in black ink, appearing to read 'Alan S. Lycars', written over a horizontal line.

APPENDIX A. FIELD DATA RECORDS

1.0 PURPOSE OF ASSESSMENT

During October 1992, a limited assessment of site conditions was conducted in the vicinity of two underground storage tanks (USTs) at the Spillane Car Rental Company (Spillane) site in South Portland, Maine and, subsequently, to observe their removal. A site location map is provided on Figure 1. The intent of this assessment is to evaluate whether the underground storage tank facility has discharged petroleum product into the environment.

To accomplish this objective, a limited field investigation was performed. The field investigation consisted of observing the removal of two USTs and associated piping, and evaluating soil conditions encountered in the tank excavations. Additional tasks included a limited review of site history and a review of the environmental setting of the property. This assessment did not include an evaluation of abutting properties or of asbestos containing materials in on-site structures or on site property.

This assessment has been undertaken according to the provisions set forth in Chapter 691 of Maine Department of Environmental Protection (DEP) regulations regarding the closure of underground storage facilities by removal. The context and format of this assessment is based on the requirements specified in Appendix P of Chapter 691.

2.0 SITE LOCATION AND DESCRIPTION

The Spillane site is located at 60 Darling Avenue in South Portland, Maine. According to the City of South Portland Tax Map (Map 92a, Lot 8496.01), the property consists of a parcel of land that is bounded to the south by Darling Avenue, and to the north, east, and west by commercially-developed properties.

As shown on the site sketch (Figure 2), the garage and office building occupies the northwestern portion of the site. The structure is a single story commercial building constructed on a concrete slab foundation. The UST facility was located adjacent to a portable office trailer.

The site contained two Underground Storage Tanks used to store gasoline. For the purpose of discussion, the tanks were designated T-1 and T-2.

UST T-1 was reportedly a 3,000 gallon capacity single-wall steel tank containing gasoline. UST T-2 was reportedly a 2,000 gallon capacity single-wall steel tank containing gasoline. Both tanks were located beneath the paved driveway area adjacent to the portable office building. Both USTs were connected to steel suction piping which extended to the dispenser island located directly over the USTs (Figure 2). Vent risers were attached to the USTs in a similar manner.

Site topography is flat at the Spillane site. Soils at the site consisted of coarse medium sand and small gravel borrow from one to approximately five feet below ground surface

(bgs). Native soils in the excavation base appeared to be tight silty clay. Groundwater, which was probably perched, was observed in the excavation at approximately five feet bgs. Ground water resource mapping by the Maine Geological Survey (Caswell and Prescott) indicate the site is not located on a mapped sand and gravel aquifer.

Abutting properties, including the site, are serviced by the Portland Water District for drinking water. Sewer service is provided to the site by the City of South Portland. There are no known private wells located within 300 feet of the facility, nor any known public water supplies within 2,000 feet of the facility.

3.0 SITE HISTORY

Two single-wall steel USTs were installed at this site in 1973 for the purpose of motor fuel storage. Mr. Ralph Gilman is the owner of the property.

4.0 FIELD INVESTIGATION

4.1 UST EXCAVATION AND REMOVAL

On October 19, 1992, two single-wall steel USTs (T-1 and T-2) were excavated and removed from the ground. The USTs were removed to comply with Maine DEP Underground Storage Tank Regulations Chapter 691. Tank removal activities were performed to meet the following objectives:

- assess the integrity of the USTs being removed;
- evaluate subsurface geologic and hydrogeologic conditions in the vicinity of the tank excavation area;
- evaluate evidence of possible petroleum releases such as sheens, odors, volatile organic compound vapors in soil or the release of free product in the tank excavation;
- assess the nature and extent of impacts from possible releases; and
- recommend future measures, if warranted.

Tank excavation and removal were performed by Portland Pump Company of Scarborough, Maine. Mr. Alan Lyscars was present to observe tank excavation and removal activities. Following removal of the tanks, a visual survey was performed to evaluate their physical condition. Product staining was observed on the undersides of both removed tanks. Visible evidence of surface corrosion was observed on both tanks. One corrosion-induced hole, approximately 2mm in diameter, was observed in the bottom of each of the USTs. All excavation soils exhibited a strong gasoline odor, and free product was observed in the excavation on groundwater at approximately five feet bgs.

Suction and vent piping was observed to be corroded. Dark staining was observed on both fill pipes.

5.0 FIELD HEADSPACE SOIL SCREENING

After the tanks and associated piping were removed from the ground, an assessment of petroleum-related impacts to soil in the tank excavation and pump island areas was performed. The assessment consisted of visual, olfactory, and field headspace screening of selected soil samples for the presence of volatile organic compound (VOC) vapors using a Thermo Environmental TE-580B photoionization detector (PID). Three soil samples were taken from under the dispenser island at approximately four feet bgs. Their average headspace response was 332 ppm total VOCs. Since the MEDEP notification point is 100 ppm, Mr. Steve Flannery, a Responder with the MEDEP Portland office, was called. After visiting the site and observing the open excavation, Mr. Flannery, noting the commercial nature of the site and adjoining properties, did not require cleanup at this time.

6.0 SUBSURFACE CONDITIONS

Soils at the site consisted of coarse medium sand and small gravel borrow from one to approximately five feet below ground surface (bgs). Native soils in the excavation base appeared to be tight silty clay. Groundwater, which was probably perched, was observed in the excavation at approximately five feet bgs. Ground water resource mapping by the Maine Geological Survey (Caswell and Prescott) indicate the site is not located on a mapped sand and gravel aquifer. Petroleum impacted soils were observed in all areas of the excavation. Free product was observed to be present in the excavation.

7.0 SUMMARY OF FINDINGS

During October 1992, Alan Lyscars observed the removal of two steel single-wall USTs at the Spillane Car Rental site in South Portland, Maine. The principal objectives of this assessment were to evaluate subsurface conditions in the vicinity of the former USTs, assess the integrity of the tanks being removed, and evaluate soil quality. To accomplish these objectives, the activities described in this report were performed and included:

- a limited review of site history;
- evaluation of subsurface soil conditions; and,
- evaluation of evidence of possible petroleum releases such as sheens, odors, volatile organic compound vapors in soil or the presence of product in the UST excavation areas.

To qualitatively assess potential petroleum impacts to subsurface site soils, field screening of soil obtained from the tank excavation area was performed.

Two USTs installed in 1973 were removed from the ground during October 1992. Following removal, a visual survey of the tanks and associated steel piping was performed to evaluate their condition. All tanks exhibited surface corrosion. One corrosion-induced hole, approximately 2mm in diameter, was observed in the bottom of each of the USTs. Petroleum contaminated soils which were present in the tank excavation were not removed, per MEDEP, for disposal.

Based on the limited data observed or collected during this assessment, petroleum-related impacts to soil and groundwater appear to have been severe at this facility. Off-site conditions were not evaluated as part of this assessment. Removal of the USTs likely removed the majority of the potential source of residual petroleum product reported present in soil and groundwater. However, the extent of the petroleum release at this site could not be determined within the limited scope of this assessment.

A hydrogeologic investigation to determine vertical and areal extents of petroleum impacts is recommended.

8.0 LIMITATIONS

This assessment was performed according to generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area. Alan Lycars observed a degree of care and skill generally exercised by other consultants under similar circumstances and conditions. Alan Lycars' findings and conclusions must be considered not as scientific certainties but rather as professional opinion concerning the significance of the limited data gathered during the course of this investigation. Specifically, Alan Lycars does not and cannot represent that the site contains no hazardous material, oil, or other latent conditions beyond the immediate location of the site assessment. No other warranty, expressed or implied, is made.

STATE HOUSE STATION 17 AUGUSTA, MAINE 04333

DEPARTMENT ORDER

IN THE MATTER OF

RALPH R. GILMAN d/b/a)	UNDERGROUND OIL
SPILLANE CAR RENTAL CO.)	
SOUTH PORTLAND, CUMBERLAND CTY, MAINE)	STORAGE FACILITIES
UNDERGROUND OIL STORAGE FACILITY OWNER)	AND GROUNDWATER
CLAIM TO THE MAINE GROUNDWATER)	PROTECTION LAW
OIL CLEANUP FUND)	FINDINGS OF FACT
REGISTRATION # 145 ("DENIAL"))	AND ORDER

After review of a request for coverage of petroleum discharge cleanup costs by the Groundwater Oil Cleanup Fund ("Fund") pursuant to 38 M.R.S.A., Section 568-A, the Department's files and supporting materials pertaining to the applicant's compliance with 38 M.R.S.A, Sections 561-570, submitted by the applicant Ralph R. Gilman d/b/a Spillane Car Rental Co. ("Gilman"); the Department finds the following facts:

1. Gilman owns a parcel of land located at 60 Darling Avenue in South Portland, Maine. Gilman owns and operates a registered underground oil storage facility (# 145) at this site. This facility consisted of one 3,000 gallon unleaded gasoline tank installed in 1973 manifolded with one 2,000 gallon unleaded gasoline tank installed in 1973, one 500 gallon #2 heating oil tank installed in 1982, and one 500 gallon waste oil tank installed in 1982. All tanks and piping were constructed of bare steel.
2. The facility location is not a sensitive geologic area as defined by Title 38 M.R.S.A., Section 562-A.19 and Department regulations, Chapter 691, Section 3.QQ.
3. On August 4, 1992, excess water was pumped from the 3000 gallon/2000 gallon manifolded system described above, and fill caps for both tanks were replaced to prevent water incursion through the fill pipes. After a significant ingress of water into this system was again discovered and pumped from the facility on August 8, 1992, the Department was notified of this evidence of a leak on August 10, 1992, and arrangements were made to have the facility precision tested. A precision test conducted on August 28, 1992 yielded failing results due to water ingress into the 3000 gallon tank.
4. On October 19, 1992, Gilman removed the 3,000 gallon and 2,000 gallon unleaded gasoline tanks referenced above. During the excavation of the tanks Gilman discovered oil contaminated soil and reported it to the Department.

RALPH R. GILMAN d/b/a	2) UNDERGROUND OIL
SPILLANE CAR RENTAL CO.)
SOUTH PORTLAND, CUMBERLAND CTY, MAINE) STORAGE FACILITIES
UNDERGROUND OIL STORAGE FACILITY OWNER) AND GROUNDWATER
CLAIM TO THE MAINE GROUNDWATER) PROTECTION LAW
OIL CLEANUP FUND) FINDINGS OF FACT
REGISTRATION # 145 ("DENIAL")) AND ORDER

5. On December 7, 1992, the applicant submitted to the Department a request and agreement for coverage of clean up costs as authorized by the Maine Groundwater Oil Cleanup Fund, 38 M.R.S.A., Section 568-A. In support of his request the applicant has submitted the following:
 - A. A description of the discharge and locations threatened or affected by the discharge; and
 - B. An agreement to pay the initial costs of cleanup and third party damage claims up to the deductible amount specified in 38 M.R.S.A., Section 568-A.2.

6. Based on the claim submitted by the applicant, Gilman owns underground tanks at a total of one site. If eligible for coverage, the applicant must pay a deductible of \$2,500.00 of the eligible cleanup costs.

7. The applicant may be found eligible for Fund coverage provided the following requirements are met, pursuant to 38 M.R.S.A., Section 568-A.1:
 - A. A written request for coverage must be submitted within 90 days of reporting the discharge;
 - B. The applicant must be in substantial compliance with:
 1. The schedule for proper abandonment of non-conforming facilities, in Section 563-A;
 2. Any outstanding consent agreement or clean up order issued by the Commissioner regarding violations of Sections 561-570;
 3. Any outstanding court order or consent decree regarding violations of Sections 561-570; and
 4. The applicable requirements for installation, operation, leak detection, reporting of oil discharges, and payment of registration fees for motor fuel storage facilities.
 - C. The facility can not be owned or operated by the Federal Government;
 - D. The applicant must have no relationship with an entity that owns or operates an oil refinery as described in Section 568-A.1.E.

RALPH R. GILMAN d/b/a	3) UNDERGROUND OIL
SPILLANE CAR RENTAL CO.)
SOUTH PORTLAND, CUMBERLAND CTY, MAINE) STORAGE FACILITIES
UNDERGROUND OIL STORAGE FACILITY OWNER) AND GROUNDWATER
CLAIM TO THE MAINE GROUNDWATER) PROTECTION LAW
OIL CLEANUP FUND) FINDINGS OF FACT
REGISTRATION # 145 ("DENIAL")) AND ORDER

8. If eligible for coverage, the applicant may seek coverage of clean-up costs and third party damage claims totaling less than \$1,000,000.00 per occurrence or \$2,000,000.00 aggregate, in a calendar year.

9. The applicant has entered into a written agreement with the Department which includes sanctions for non-compliance with the agreement, provisions for accounting and reporting of costs incurred in remediation activities, and an agreement to clean up the site to the satisfaction of the Commissioner.

10. A review of the applicant's claim and the Department's file demonstrates that the:
 - A. Applicant submitted a written request for coverage within 90 days of reporting the oil discharge.
 - B. Applicant is not in substantial compliance with the requirements in 38 M.R.S.A. Section 568-A.1.B.
 - C. Facility is not owned or operated by the Federal government.
 - D. Applicant has none of the relationships with an entity that owns an oil refinery, which would make it ineligible for coverage, as listed in 38 M.R.S.A. Section 568-A.1.E.

11. The applicant is not in substantial compliance with the following requirements listed in Section 568-A.1.B:
 - A. Maintenance, recording and reconciliation of daily inventory to identify evidence of a leak as required by Section 564.2-A.H.(1).: Inventory records submitted to the Department were incomplete and were not reconciled daily; and
 - B. Reporting evidence of a possible leak to the Commissioner as soon as possible but no later than within 24 hours as required by section 564.2-A.H. and Chapter 691, Section 5.D.9(vii): The applicant discovered water in his underground gasoline storage facilities and contracted to have excessive accumulation of water pumped from the facilities on July 25, 1992 and at least two other occasions prior to August 10, 1992. The applicant finally ceased operation of the underground storage facilities on August 13, 1992.

RALPH R. GILMAN d/b/a	4) UNDERGROUND OIL

BASED on the above Findings of Fact, the Department CONCLUDES the applicant is ineligible for coverage by the Fund, pursuant to Section 568-A.1.A. due to the following:

1. The applicant is not in substantial compliance with the requirements listed in Section 568-A.1.B. including:
 - a. the maintenance, recording and reconciliation of daily inventory to identify evidence of a leak as required by Section 564.2-A.H.(1). Inventory records submitted to the Department were incomplete and were not reconciled daily; and
 - b. reporting evidence of a possible leak to the commissioner as soon as possible but no later than within 24 hours as required by Section 564.2-A.H. and Chapter 691, Section 5.D.9(vii). The applicant discovered water in his underground gasoline storage facilities and contracted to have excessive accumulation of water pumped from the facilities on July 25, 1992 and at least two other occasions prior to August 10, 1992. The applicant finally ceased operation of the underground storage facilities on August 13, 1992.

RE: Warren Rogers Associates Statistical Inventory Reconciliation Analysis™

Enclosed are the results of your Warren Rogers Associates Statistical Inventory Reconciliation Analysis (WRA SIRA™). There is an individual report for each tank as well as a summary sheet. In the summary, a trend of 0 indicates no loss, whereas a number indicates that amount in gallons is being lost hourly. A trend of "N/A" indicates an operational problem, which is explained in detail in the tank report.

Please note that, for consistency with the terminology used by US EPA, indicated losses and minimum detectable leak rates are now expressed in gallons per hour (gph) rather than gallons per day.

The color code on the top of the page indicates the status of the location:

- GREEN No tanks show a loss, and the minimum detectable leak rates are below 0.2 gallons per hour (gph).
- YELLOW An operational problem exists and should be investigated.
- YELLOW+ A non-reportable (less than 0.2 gph) loss is indicated and should be investigated.
- RED A loss greater than 0.2 gph is indicated; immediate investigation is necessary.

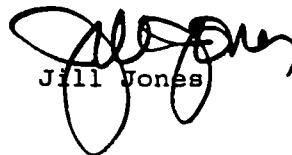

If a loss trend is greater than 0, you may have a leak. For all loss reports, investigative procedures from the American Petroleum Institute Publication 321 (attached if a loss trend is shown) should be used to determine whether a problem exists. If you identify the problem as mechanical or employee related, we recommend that an additional 31 days of inventory data be sent to WRA for verification. If the problem cannot be identified, a precision tank test should be performed.

A copy of this report should be forwarded to:

8. MAKE TWO COPIES of this form. SUBMIT the original to the DEPARTMENT OF ENVIRONMENTAL PROTECTION (Bureau of Oil & Hazardous Materials Control, State House Station 17, Augusta, Maine 04333). SEND one copy to the LOCAL FIRE DEPARTMENT having jurisdiction. RETAIN the third copy for your records. For new and replacement tanks, registrations are due at least five (5) business days prior to installation. Registrations for existing tanks are due prior to February 1, 1986.

9. CERTIFY THIS FORM BY SIGNING. By signing this form, the tank registrant certifies that all information is accurate and complete, and that they will comply with all applicable federal, state and local laws and regulations concerning the underground storage of petroleum or other hazardous materials. The owner or operator is required by Maine statute to file an amendment to this registration with the Department of Environmental Protection immediately upon any change in the information on this form.

ME 04106

Facility Registration Number: 16844

Date of Registration: APRIL 17, 1990

Operator:

CANTEEN CORP.

SOUTH PORTLAND
ME 04106

Sensitive Area Status:

NONE

Owner:

~~ALLIED CONSTRUCTION COMPANY~~
~~P.O. BOX 1396~~
~~PORTLAND~~
~~ME 04106~~

SCS Family Realty
29 Western Ave.
So. Portland, ME 04106

Facility Use:

OIL STORAGE/COMMERCIAL ESTAB

Number of Tanks: 0
(See accompanying list for detailed breakdown)

IF THE INFORMATION ON THIS FORM IS ACCURATE AND COMPLETE, PLEASE RETAIN FOR YOUR RECORDS.

The Maine Department of Environmental Protection must be notified of any errors or changes in the information on this form. To accomplish this, please draw a line through the incorrect or outdated information, insert the correct information, and return this form to:

DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF OIL AND HAZARDOUS MATERIALS CONTROL
STATE HOUSE STATION #17
AUGUSTA, MAINE 04333
ATTN: Underground Tanks Program

If you have any questions concerning this process, please call (207)287-2651 and ask for the administrator of the Underground Storage Tanks program.

INDIVIDUAL TANK DATA
FOR
SITE NUMBER:

16844

TANK NUMBER	TANK TYPE	PIPING TYPE	TANK SIZE	ADDITIONAL MONITORING	PRODUCT STORED	DATE INSTALLED	TANK STATUS
1	STEEL/BARE ASPHALT	GALVANIZED STEEL	4,000	NONE	FUEL OIL #2	NK/NK	REMOVED

**DEPARTMENT OF ENVIRONMENTAL PROTECTION
REGISTRATION FORM FOR UNDERGROUND OIL
AND HAZARDOUS SUBSTANCES (CHEMICAL)
STORAGE TANKS
(Pursuant to 38 M.R.S.A. Section 563, 40 CFR Part 280)**

1. REGISTRATION NUMBER: 16844
(Complete only if a registration has
been previously assigned by the Department
of Environmental Protection.)

STATE USE ONLY
DATE OF REGISTRATION: 4/17/90

2. FACILITY INFORMATION

- A. Name of Facility: CANTEEN CORP.
- B. Street Address of Facility: 76 Darling Ave.
- C. Town/City where facility is located: So. Portland
- D. Mailing address: % Allied Construction, PO BOX 1396, PORTLAND
- E. Zip Code: 04106 F. Telephone: (207) 772-2888
- G. Directions to Facility: So. Portland Fodon Rd. Rgt off Western Ave
3rd Building on Rgt.
- H. Are any planned or existing tank(s) (including piping and pumps) within 1000 feet of a public water supply source? Yes___ No X
- I. Are any planned or existing tank(s) (including piping and pumps) within 300 feet of a private water supply source? Yes___ No X
- J. (Complete if the answer to (I) above is YES.) Is the water supply which is located within 300 feet of the tank(s) owned by someone other than the facility owner or operator? Yes___ No___
- K. Is the facility located on a sand and gravel aquifer or recharge area as mapped by the Maine Geological Survey? Yes___ No X

(If you wish assistance in answering item (K), please call the Department at (207)289-2651. Sand and gravel aquifer maps can be reviewed at any of the Department's offices or purchased at a nominal fee from the Maine Geological Survey, State House Station #22, Augusta, Maine 04333, (207)289-2801.)

If the answer to item (H), (J) or (K) above is yes, the facility is in a sensitive geologic area requiring certain conditions for tank installation. A new or replacement tank used for marketing and distribution of oil in such an area requires secondary containment or ground water monitoring.

NOTE: The installation of 21,000 gallons or greater combined tank capacity, on a significant sand and gravel aquifer requires the installation of 360° double containment tanks and piping with interstitial monitoring.

|--|--|

12. If this registration involves the replacing or installing of tanks or piping, the following information must be attached:
- (a) A map, plotted on the most current 1:24,000 scale (7½ minute) USGS topographical quadrangle, showing the location of the facility. If a 7½ minute map is not available, a 1:62,500 scale (15 minute) map may be used.
 - (b) Attach a drawing of the facility showing the location of TANKS AND PIPING to be installed and any existing tanks. **THE FORM OF ADDITIONAL PROTECTION** for tanks used for marketing and distribution of oil in sensitive areas **MUST BE DETAILED ON THE DRAWING**. Monitoring well locations must be provided for all tanks greater than 1,100 gallons used for on-site consumption of oil.

3. TANK OWNER: A. Name: Allied Construction
 (last) (first) (middle initial)
 B. Mail Address: PO BOX 1396
 C. Town/City: Portland D. State: Maine
 E. Zip Code: 04106 F. Phone: (207) 772-2888
4. TANK OPERATOR: A. Name: CANTEEN CORP.
 (if different from owner)
 B. Mail Address: 76 Darling Ave.
 C. Town/City: So. Portland D. State: Maine
 E. Zip Code: 04106 F. Phone: _____
5. CONTACT PERSON: A. Name: Lola Orcutt B. Phone: (207) 772-2888

6. Attach a check for the applicable registration fee made payable to the State of Maine Groundwater Fund and return with this form to the Department of Environmental Protection (Bureau of Oil and Hazardous Materials Control—State House Station #17, Augusta, Maine 04333).

Registration fees are applicable ONLY to active, new, or replacement tanks used for the MARKETING AND DISTRIBUTION OF OIL. Registration fees are due upon registration and annually thereafter, prior to the FIRST DAY OF JANUARY. Fees are as follows:

Number of Tanks _____ 6,000 gallons or under in size at \$25.00 per tank = \$ _____
 Number of Tanks _____ over 6,000 gallons in size at \$50.00 per tank = \$ _____

Fee Computation Worksheet:

- a. _____ # tanks 6,000 gallons or under in size at \$25.00 per tank = \$ _____
 b. _____ # tanks over 6,000 gallons at \$50.00 per tank = \$ _____
 c. Total Annual Fee due — add a & b = \$ _____

7. MAKE TWO (2) COPIES OF THIS FORM. Submit the original to the Department of Environmental Protection (Bureau of Oil and Hazardous Materials Control—State House Station #17, Augusta, Maine 04333). SEND ONE (1) COPY TO THE LOCAL FIRE DEPARTMENT having jurisdiction. RETAIN THE THIRD COPY FOR YOUR RECORDS. For new and replacement tanks, registrations are due at least five (5) business days prior to installation.

8. Complete the next two (2) pages of this form and include each tank currently at the facility and each new or replacement tank planned for the facility.

9. CERTIFY THIS FORM BY SIGNING. By signing this form, I, the tank registrant, certify that all information is accurate and complete to the best of my knowledge, and that I will comply with all applicable federal, state, and local laws and regulations concerning the underground storage of petroleum or other hazardous materials. The owner or operator is required by Maine statutes to file an amendment to this registration with the Department of Environmental Protection immediately upon any change of information contained in this form.

NOTICE OF INTENT
TO ABANDON (REMOVE) AN
UNDERGROUND OIL STORAGE FACILITY

PLEASE TYPE OR PRINT IN INK:

Name of Facility Owner: Allied Construction
Mailing Address: PO Box 1396 Telephone No.: 772-2888
City: Portland Me State: Maine Zip Code: 04106
Contact Person (name, address & telephone no.): DON COOK - SAM

Name of Facility: 76 Darling Ave Registration No.: 8276?
Facility Location: So. Portland, Me 04106

1. Identify the tanks at this location which are to be removed:

<u>Tank Number</u>	<u>Age of Tank (Years)</u>	<u>Tank Size (Gallons)</u>	<u>Type of Product Most Recently Stored</u>
A.	15 gal	1000 gal	#2 fuel
B.			
C.			
D.			

2. Directions to Facility (be specific):

So. Portland To Foden Rd. Take rt off Western Ave Right
Third Bldg on Right

3. Is tank(s) used for the storage of Class I liquids (e.g. gasoline, jet fuel)? Yes No (IF YES, REMOVAL OF THE TANK MUST BE UNDER THE DIRECTION OF A CERTIFIED TANK INSTALLER OR PROFESSIONAL FIREFIGHTER.)

4. Name and telephone number of contractor who will do the tank removal: CES 773-1122

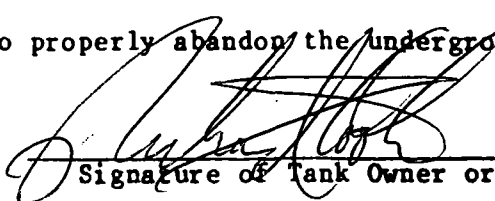

Certified Tank Installer Certification Number & Name (if applicable):
#270 Paul Fearon

Professional Firefighter Yes No (Affiliation: _____)

5. Expected date of removal: 11/20/89 ~~7/27/89~~ or Thereabouts

I hereby provide Notice that I intend to properly abandon the underground oil storage facility as described above.

Date: 7-20-89

Signature of Tank Owner or Operator

Printed Name and Title

THIS FORM MUST BE FILED WITH THE DEPARTMENT AND LOCAL FIRE DEPARTMENT 10 DAYS PRIOR TO REMOVAL

Mail original and yellow copy to DEP; pink copy to fire dept.; retain gold copy

City Directory Report

Envirosite's City Directory report is a screening tool designed to assist in evaluating a subject property and possible adjacent properties resulting from past activities. It includes a search and abstract of available city directories and cross reference directories at five year intervals or the closest available intervals. Public map sources are reviewed to determine possible adjoining properties to the front, back, left and right of the property.

RESEARCH SUMMARY:

The following research sources were consulted in the preparation of this report:

<u>SOURCE:</u>	<u>YEAR:</u>
Property Archives	2018, 2015, 2011, 2006, 2001, 1998
Greater Portland City Directory	1993, 1988
Portland City Directory	1967, 1962, 1957, 1954, 1948, 1939, 1934, 1929, 1923, 1917, 1913, 1912, 1907, 1902, 1897, 1892, 1887, 1882, 1877, 1873, 1871

Property Archives is a proprietary and comprehensive database of over one billion commercial and residential records, business names and occupant records for every city and town in the United States. This database is owned by Property Archives, LLC.

This report was prepared by Property Archives, LLC for Envirosite Corporation

QUITCLAIM DEED WITH COVENANT
(statutory short form)

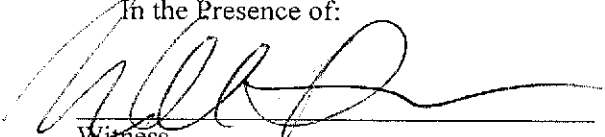

KNOW ALL PERSONS BY THESE PRESENTS, that **Treehouse, LLC**, a Maine limited liability company and **75 Darling Ave, LLC**, a Maine limited liability company, both with a mailing address of P.O. Box 491, Portland, ME 04102 (collectively "Grantor"), for consideration paid, grant to **75 Darling Preble Street, LLC**, a Maine limited liability company with a mailing address of 38 Preble Street, Portland, ME 04101, with QUITCLAIM COVENANT, a certain lot or parcel of land together with the buildings thereon, located on or about Darling Avenue, in the City of South Portland, County of Cumberland and State of Maine and bounded and described in **Exhibit A** attached hereto and incorporated herewith.

Being the same property described in a deed from David D. Chase and D. Kelly Young, Co-Trustees of the 75 Darling Avenue Irrevocable Trust, to Grantors herein, dated November 20, 2017 and recorded in the Cumberland County Registry of Deeds in Book 34478, Page 230.

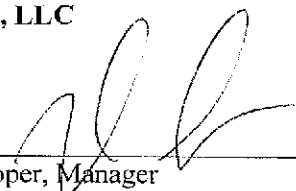

IN WITNESS WHEREOF, the undersigned Joseph Cooper, the duly authorized Manager of Treehouse, LLC and duly authorized Manager of 75 Darling Ave, LLC hereby sets his hand and seal this 3rd day of March 2022.

ME Bar No 4012

Exhibit A

75 Darling Avenue, South Portland, Maine

Beginning at an iron on the westerly side of said Darling Avenue marking the southeasterly corner of land conveyed by Greater Portland Building Fund to Donald W. Cook by deed dated January 24, 1973 and recorded in the Cumberland County Registry of Deeds in Book 3353, Page 212; thence running South 10° 11' East by the westerly line of said Darling Avenue a distance of 200.00 feet to an iron and land of said Great Portland Building Fund; thence by said land of Greater Portland Building Fund on a course of South 79° 49' West a distance of 453.25 feet to an iron and land now or formerly Herbert E. Ginn; thence by said Ginn land on a course of North 12° 48' 30" West a distance of 200.21 feet to an iron marking the southwesterly corner of land of Donald W. Cook; thence by said Cook land on a course of North 79° 49' East a distance of 462.37 feet to the point of beginning.

The above courses are magnetic 1955.

Meaning and intending to convey all of lot lettered "B" as shown on a plan of land entitled "Plan of Property in South Portland, Maine made for Greater Portland Building Fund (Airport Industrial Park)" by H.I. & E.C. Jordan, Surveyors, said Plan having been recorded on June 14, 1976 in said Registry of Deeds in Plan Book 113, Page 58.

This conveyance is made subject, however, to an easement given by Greater Portland Building Fund, Inc. to the Portland Water District over the most easterly 22.50 feet of the premises conveyed herein.

APPENDIX H

ENVIRONMENTAL QUESTIONNAIRES

HALEY WARD

ENGINEERING | ENVIRONMENTAL | SURVEYING

FORMERLY:  CES INC

USER QUESTIONNAIRE

Property Identification: Food Security Hub

Property Address: 75 Darling Ave., South Portland, Me 04106

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Please add additional pages as necessary to complete the questionnaire.

(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

No.

(2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

No.

(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No specialized knowledge.

(4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a

difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Purchase price paid for this property reasonably reflects the fair market value of the property.

(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- (a) Do you know the past uses of the property? Property is former office building.
- (b) Do you know of specific chemicals that are present or once were present at the property? No.
- (c) Do you know of spills or other chemical releases that have taken place at the property? No.
- (d) Do you know of any environmental cleanups that have take place at the property? No.

(6) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

No.

PHASE I ESA QUESTIONNAIRE

Date of Interview: 11/4/22_____

Property/Site Identification: Food Security Hub

Property/Site Address: 75 Darling Ave., South Portland, Me 04106

Current Owner of the Property: Preble Street

Current Operator of the Property: Preble Street

Name of Person/Persons Being Interviewed: Christopher Saunders

Association/Position Relative to the Site: Preble Street Vice President of Operations

Name of Person/Persons Completing Questionnaire: Christopher Saunders

For each question noted below, provide any additional descriptive information or explanation appropriate to the subject property (the Site).

- 1. Have any environmental assessments, analytical testing, reviews, studies, audits, or similar evaluations been completed for the property/site or abutting properties?**
None to our knowledge.
- 2. Has the site been visited by a regulatory agency representative for any reason?**
Yes. Long Creek Management District evaluates stormwater run-off into Long Creek.
- 3. What is the current use of the property/site?**
Preparation of meals for food insecure population and warehousing of food for distribution to food insecure population.
- 4. Are there wetlands on the property/site?**
No.
- 5. Describe adjacent property use and any features relevant to the property/site?**
Property to the north is office building for Generac, a company which supplies and services generators. Property to the south is Fork Food Labs. Currently under construction, but will house many small food producers in shared space.
- 6. What is the method of sanitary sewage disposal (septic system, municipal sewer services) on the Site?**
Municipal wastewater
- 7. If the Site is served by a private well or non public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency?**
n/a

- 8. What is the age of the building(s)/structure(s)?**
Built in 1977—45 years old.
- 9. What background and historical information are known about the site physical conditions, prior use and residential-commercial-industrial operations? Note available site building plans, aerial photography, taxmaps, fire insurance maps, etc.:**
To our knowledge, building has always been used for office space.
- 10. What, if any, are the current or former environmental and land use permits, licenses, etc. held by the existing and former operators/owners of the property/site? Note licenses pertaining to land, air and water; waste handling; operational activities, etc.:**
Preble Street has received Site Plan approval for building project within the General Commercial zone.
- 11. How has the site property boundaries and/or ownership changed over the years?**
South Portland assessment records show four owners from 1986 to present. Property appears to have been subdivided from adjacent properties in 1976. Reference Recorded Plan Volume 113, Page 58 in the Cumberland County Registry of Deeds.
- 12. Is there any knowledge of asbestos being present in these building(s)/structure(s) now or in the past?**
No knowledge.
- 13. Has any type of asbestos survey been conducted in these building(s)/structure(s)?**
No.
- 14. Are there any fluorescent light fixtures in these structures that may contain ballasts with PCBs?**
No knowledge.
- 15. Describe past and present heating and cooling systems used in the building(s)/structure(s)?**
Natural gas rooftop unit. Forced hot air heating and cooling.
- 16. Has fill material been brought to the site?**
Not to our knowledge.
- 17. What is the nature of the fill (e.g., construction debris, trash, clean soil, unknown) and can the source be identified or characterized?**
n/a
- 18. What is known about the native soil, bedrock or man-made subsurface conditions at the property/site?**
Nothing known
- 19. Are there currently, or have there been previously, any pits, ponds, lagoons, in-ground storage structures, acid neutralization structures or similar features on the property/site which may have been used in connection with waste treatment or waste disposal?**

Not to our knowledge

- 20. Is the property/site currently used, or has it previously been used, for any of the following: (a) industrial or manufacturing operation, (b) gasoline station, (c) motor repair facility, (d) commercial printing facility, (e) dry cleaners, (f) photo developing laboratory, (g) junk yard or landfill, (h) waste treatment storage, disposal, or recycling facility, (i) burning operations, (j) sand blasting operation, (k) chemical handling operation, or (l) waste staging or transfer location?**

Not to our knowledge.

- 21. Are any adjoining properties/sites currently used, or have been used in the past for any of the activities identified in Question #20?**

Not to our knowledge.

- 22. Are there currently, or have there been previously, any damaged or discarded automotive or industrial batteries, transformers, paints, solvents, petroleum products or other chemicals, wastes, etc. stored or used at the property/site?**

Not to our knowledge

- 23. Are there currently, or have there been previously, any industrial drums, sacks, pails, or other containers of chemicals, wastes, etc. located on the property/site?**

Not to our knowledge.

- 24. Are there currently, or have there been previously, any underground or aboveground storage tanks (e.g., petroleum, chemical or waste) on the property/site? Note size, age, use, registration, removal, leak detection, tightness testing, spill(s), cleanup or other related information:**

Not to our knowledge.

- 25. Are there currently, or have there been previously, any floor drains, sumps or other types of drain pipes inside, outside or beneath the building/structures located at the property/site? Note building layout, construction, floor plans or other types of site plan information:**

Sumps in kitchen area to comply with air gap requirement in plumbing code.

- 26. Are there currently, or have there been previously, any evidence of staining on building or ground (e.g., soil, asphalt, etc.) surfaces or any stressed vegetation which may be related to chemicals or waste materials, or which may be related to chemicals or waste materials, or which may be emanating foul odors?**

Not to our knowledge.

- 27. Are there currently, or have there been previously, any use of surface water or ground water resources located on or near the property/site?**

Not to our knowledge.

- 28. Are there currently, or have there been previously, any water supply wells or monitoring wells located on the property/site? Note any construction details, location or use information:**

Not to our knowledge.

- 29. Are you aware of any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the property/site, to any facility located on the property/site, or to any properties in the vicinity?**
No.
- 30. Are you aware of any environmental litigation or administrative action related to a release or threatened release of any hazardous substance, waste, or petroleum product involving the property or an abutting property?**
No.
- 31. Are there any site safety plans (SSP), spill prevention, countermeasure and control (SPCC) plans or other operational plans for the property/site?**
No.
- 32. Other than storm water or water discharged into a sanitary sewer system, does the site facility or facilities discharge waste water onto the subject property/site or onto any adjacent property?**
No.
- 33. Are there any septic system, dry wells, leach fields, or other subsurface disposal structures on the property/site? Note any construction or location details and evidence of discharges to these systems:**
No.
- 34. Have any hazardous substances, chemical wastes/products or petroleum products been discharged, leaked, spilled, or potentially released on or beneath the property?**
Not to our knowledge.
- 35. Have any demolition debris, hazardous substances, petroleum products, unidentified waste materials, automotive or industrial batteries, fires, trash, refuse, etc. been dumped, buried and/or burned on the property/site?**
Not to our knowledge.
- 36. Are there currently, or have there been previously, any transformers, capacitors, or any hydraulic equipment on the property/site?**
Yes, there is a transformer.
- 37. List an inventory of existing or former chemical products used and wastes generated at the property/site based on MSDS information, employee information, licensing records, etc.:**
Household cleaners for janitorial activities (Lysol, Windex, sanitizer, etc.)

General Comments:

The undersigned acknowledges and agrees that the information provided in this questionnaire may be reasonably relied upon and that there is no reason to suspect the information to be intentionally false, misleading or inaccurate.

APPENDIX I

ENVIRONMENTAL PROFESSIONAL QUALIFICATIONS

HALEY WARD

ENGINEERING | ENVIRONMENTAL | SURVEYING

Suzanne L. Yerina, LG

Senior Project Geologist

Senior Project Manager

syerina@haleyward.com | 207.795.6009

Suzanne Yerina has over 29 years of experience as a geologist. She extensively conducts environmental investigations, field sampling events (ground water, surface water, soil, and storm water), data collection, data entry, statistical analysis, and writing technical reports. Sue is also experienced in the completion of ASTM Phase I Environmental Site Assessments, including the interpretation of state regulations. In addition, Sue has conducted subsurface investigations, provided oversight for underground storage tank removals, and remediation projects in accordance with state regulations. As a Senior Project Manager, she is responsible for numerous environmental monitoring programs throughout New England.

PROFESSIONAL HISTORY

2013 – Present

Haley Ward, Inc., formerly CES, Inc.
Senior Project Geologist / Senior Project Manager

2001 – 2013

Summit Environmental Consultants, Inc.
Project Geologist / Project Manager

1993 – 2001

EA Engineering Science & Technology, Inc.
Project Geologist

AFFILIATIONS

State of Maine Asbestos Abatement Program Inspector
Confined Space Entry
40 Hour OSHA HAZWOPER
Radon Service Provider (Air and Water)
Maine Board of Water System Licensure (Board member)

CORE EXPERTISE:

Phase I ESAs
Statistical Analysis
Field Sampling Events
Asbestos Inspections

EDUCATION:

B.S. Geology, Southwest Missouri State University
A.S. Physics, Herkimer County Community College

REGISTRATIONS:

Registered Radon Tester (Air & Water #RSM50050)
Asbestos Inspector, State of Maine #AI-0451
Certified Geologist, State of Maine #GE482
Very Small Water System License, Maine
Professional Geologist, State of New Hampshire #878
Industrial Waste Water Operator License, MD
Geology Licenses in the states of Pennsylvania, New York, Tennessee, and Florida

PROJECT EXPERIENCE

Environmental Assessments | Various Sites, New England

Sue has been Project Manager for multiple environmental assessments including Phase I ESAs in compliance with the All Appropriate Inquiry (AAI) Rule. Assessments included interviews with state and local officials, questionnaires for owner/operators, regulatory file reviews, database searches, site visits, photo logs, and review of available files for the facility. Sue's projects include commercial and residential properties as well as large forested parcels.

Coakley Landfill Superfund Site | North Hampton, New Hampshire

Responsible for managing and conducting Sampling and Analysis Plan sampling and reporting activities since 2015. Tasks include coordination with subcontractors (i.e., analytical laboratory, data validator) and field staff for monitoring events. Responsible for preparing bi-annual/annual reports which include interpreting results, conducting statistical evaluation of water quality data to identify statistically significant trends in groundwater and surface water quality. Task leader for preparation of revised Sampling and Analysis Plan and Quality Assurance Project Plan based on comments from the New Hampshire Department of Environmental Services and US Environmental Protection Agency. Field leader for emerging contaminants investigation at the Site and in surrounding residential areas.

Tri-Annual Sampling, Lewiston Solid Waste Facility | Lewiston, Maine

Sue is the Project Geologist responsible for coordinating/managing Tri-Annual sampling events at the landfill, interpreting results, conducting data validation, and providing database management services to the City of Lewiston. Technical data is prepared pursuant to requirements contained in Chapter 405, 3(C) of the Maine Solid Waste Management Regulations. The tri-annual review includes validation of reported ground and surface water data as part of the Environmental Monitoring Plan and consistent with requirements in Chapter 405 3 (A) of the Maine Solid Waste Management Regulations. As part of the Annual Environmental Monitoring Report, a statistical evaluation of annual data is performed to identify any statistically significant trends in parameter concentrations in ground water as a function of time and identify any statistically significant differences (increase) in ground water quality between downgradient sample locations and corresponding upgradient or background sample locations. Sue has also evaluated the potential cause of recent changes in groundwater quality at the active lined-ash-fill municipal landfill cells.

Ground Water and Surface Water Monitoring | Various Sites, Maine

Sue has conducted ground water and surface water monitoring for more than 50 sites. These sites include a number of solid waste, industrial, and processing type facilities. Sue is experienced with the most current technology and specialized equipment for sample collection in order to ensure that the most accurate data is obtained including MDEP/EPA approved protocols for low flow ground water purging and sampling techniques. In addition to environmental monitoring activities, Sue has prepared a number of Environmental Monitoring Plans (EMPs) which have been approved by both State and Federal agencies.

Data Management | Various Projects, Maine

Sue is responsible for data review, data entry, and reporting requirements. She utilizes many different intricate programs for data management and reporting used for environmental monitoring results including Chempoint which is a data management and reporting program, and Chemstat, which is a statistical analysis program used for comparing results. Statistical analysis includes Mann-Kendall, Kruskal-Wallis, and Sen's Slope tests. Chemstat is also used for generating time series plots. Sue is responsible for reporting data for numerous facilities to the MDEP in the Electronic Data Deliverables (EDD) format.

Environmental Investigations | Naval Air Station, Maine

Sue conducted soil, surface water, and ground water sampling; health and safety monitoring; and data analysis in support of field investigations and a long-term monitoring program. Sue performed stratigraphic evaluation and installment of monitoring wells, well development, and well abandonment. She participated in direct-push investigations involving electrical conductivity logging, soil, and ground water sampling. Sue assisted with the development and implementation of a long-term monitoring program at five sites, which utilizes sampling and testing with EPA protocols. Sue performed low-flow ground water sampling using flow through cells for extensive water quality monitoring as part of a long-term monitoring program at a federal site.

Management | Naval Air Station, Maine

As field operations leader for an environmental contractor at a Naval Air Station with up to 4 personnel on location, Sue was responsible for staffing and scheduling field operations for eight different sites, including long-term monitoring at six National Priorities Lists sites and operations and maintenance at two petroleum sites.

Dennis B. Kingman, Jr., CHMM Vice President, Senior Project Manager

dkingman@haleyward.com | 207.989.4824

Dennis Kingman has 33 years of experience providing asbestos, lead and PCB management, occupational health and safety consultation; and environmental management services to industry, public and private academic institutions, as well as local, state, and federal governments. As a Senior Project Manager and Senior Environmental Scientist, Dennis oversees, coordinates, and completes environmental, asbestos, lead-based paint (Pb), Industrial Hygiene, and Indoor Air Quality (IAQ) projects. Dennis is experienced in conducting Phase I Environmental Site Assessments and associated HUD related documentation, OSHA compliance audits, industrial hygiene monitoring, IAQ assessments, development and implementation of health and safety programs and associated training. Additionally, Dennis has served as an in-house safety manager for a large academic institution and has developed and implemented exposure assessment programs and managed asbestos management programs for a broad range of public and private sector facilities.

Member

PROJECT EXPERIENCE

Former Verso Paper Mill Environmental Management | Bucksport, Maine

Dennis has worked with the current owners of the Verso Paper Mill (Bucksport Mill LLC) to provide a wide range of environmental management consulting to support the demolition and redevelopment of the facility. These services included preparation and submission of MDEP SLODA application, completion of hazardous materials assessment for the impacted facility, preparation of asbestos abatement specifications and contractor bidding documents, preparation of demolition contractor specifications and contractor bidding documents, preparation of a partial RCRA closure program, stormwater management, Polychlorinated Biphenyl (PCB) assessment and management, and landfill monitoring and management. Dennis continues to provide support services on an as needed basis to support the on-going demolition, facility operations and facility transition.

Lower Main Street PCB Assessment and Remediation, Emera Maine | Bangor, Maine

At the request of Emera Maine (Emera), Haley Ward provided hazardous materials management support for an on-going PCB assessment and remediation project at Emera's Lower Main Street maintenance facility. The project was part of a larger RCRA closure project for the property to facilitate the transfer of the property to a commercial developer. Under Dennis' management, the Haley Ward team evaluated the status of the on-going PCB assessment, developed a stream-lined approach to characterize the extent of historic PCB contamination within two buildings on the property and completed the necessary building materials sampling which resulted in substantial cost savings for the client. Based upon the findings of the assessment, Dennis developed PCB remediation work plans for both buildings to remediate contaminated concrete and surface coatings which was reviewed and approved by the USEPA. Dennis oversaw on-site remediation oversight and post-remediation clearance inspections and verification testing. Upon completion of remediation work, Dennis developed an Environmental Covenant and long-term Monitoring and Maintenance Plan (MMP), which has been submitted to USEPA for review and approval.

Powers Hall PCB Assessment and Remediation, UMaine at Machias | Machias, Maine

Dennis managed a PCB assessment for the exterior of Powers Hall affected by planned building envelope repair project. Based upon the findings of the assessment, Dennis developed PCB remediation work plans for contaminated caulk and soils remediation which was reviewed and approved by the USEPA. Dennis oversaw on-site remediation oversight and post-remediation clearance inspections and verification testing. Upon completion of remediation work, Dennis developed an Environmental Covenant and long-term Monitoring and Maintenance Inspection Plan (MMIP), which was submitted to USEPA for review and approval.

Environmental Consultation Services – Maine State Housing Authority

Dennis has served as client manager and Senior Project Manager, providing on-call environmental consultation services for Maine State Housing Authority (MaineHousing), since 2007. Dennis works closely with MaineHousing Environmental Legal Counsel to provide

environmental services to support MaineHousing's mission. He oversees a variety of services to support the development/redevelopment of low income housing across the State of Maine including, but not limited to: completion of Phase I and Phase II ESA, MDEP Voluntary Response Action Program (VRAP) support services, hazardous materials assessments, soil vapor sampling, HUD environmental reviews, and preliminary site assessments to identify potential environmental concerns. Dennis also provides on-call support to MaineHousing on an as-needed basis.

Phase I Environmental Site Assessment (ESA) – Various Clients | New England

Dennis manages Phase I and Phase II ESAs for public and private sector clients throughout Maine and northern New England. Clients range from local and national lending institutions, attorneys, woodland property managers, developers, commercial and industrial organizations, and public and private housing development agencies. Dennis has managed and performed ESAs for properties ranging from single family residential lots, housing developments, and commercial buildings, to woodland parcels encompassing entire townships.

Margaret Chase Smith Federal Building Hazardous Materials Management | Bangor, Maine

Dennis completed Asbestos, Lead-Based Paint (LBP), and Polychlorinated Biphenyl (PCB) assessments of the MC Smith Federal Building to support current building renovations and upgrades. Dennis developed site specific remediation specifications, PCB remediation work plans for bidding, provided remediation oversight and quality control testing, and inspection services.

Indoor Air Quality and Health & Safety Assessment | Private Health Care Facility, Maine

Dennis completed an in-depth assessment of a private health care facility as a result of employee and client concerns. The assessment included evaluation of treatment processes, building utilities, employee interviews and ambient air testing. The assessment resulted in the implementation of facility improvements and process modifications, which improved workplace conditions and the quality of client care.

Bureau of General Services, State of Maine-Client Coordinator for Asbestos | Various Locations throughout Maine

Dennis acted as Senior Project Manager for asbestos-related work for various public school and state government facilities throughout the state of Maine. Work involved all aspects of Asbestos management including oversight and performance of surveys, re-inspections and development of management plans, abatement design, contract management, including the development of air monitoring plans. Dennis also conducted abatement management and provided logistical support and interaction with building occupants, parents, and employees as a representative of the client.
